

bsi.bsol

British Standards Online Library (BSOL)

A **standard management system** built with leading **industry knowledge, trusted and used** by businesses globally.

bsigroup.com/bsol

Inspiring trust for a more resilient world.

BSOL is a simple online tool that acts as your standards management system. Access, view and download standards with multiple user access, across multiple sites, facilitating the distribution of the knowledge across your business.

BSOL contains British Standards and international and European standards that have been adopted as British Standards. It also includes other standards that haven't been adopted as British Standards as well as PAS, ASTM and ASME.

You can subscribe to our pre-built modules or build a personalized standards collection, saving your organization money, reducing risk by enabling access to the latest version of standards with bibliographical data and instilling trust with your clients partnering with BSI.

Increase accessibility to standards, reduce risk and improve efficiencies

Our standards are written by leading industry experts and are trusted and used by businesses globally. A BSOL subscription is the smarter option to managing standards within your business, especially if:

- You need to access multiple standards, across different departments and offices
- Independent purchase of standards, therefore difficult to budget for and validate the value of standards for the business
- Manually keeping your standards up to date
- Employees working remotely with the need to access standards without causing delays to projects
- Access to multiple standards, including BS, PAS, ASTM and ASME standards

Best practice global standards and guidelines for all areas of business and sectors:

Exec group and board
Governance, risk, innovation, antibribery

Job functions
HR, IT, finance, legal, supply chain, security, sustainability

Theme specific
Info security, OHS, sustainability, packaging, BCM/risk, supply chain

Sector specific
Food, healthcare, built environment, transport and mobility, digital

What our customers say

When working on several structures, the use of accessing standards via BSOL allowed for the correct standards to be used – in particular those which were current and not withdrawn. This was praised by the client.

BSOL can be customized to suit your standards needs.

Since 1901, BSI has played a leading role in developing a new generation of standards to help organizations become better governed and more responsible such as anti-bribery, organizational governance and asset management. BSI has also increased collaboration with experts in new fields such as smart cities, nanotechnologies, cell therapy and Building Information Modelling (BIM).

Tailor a custom standards database of exactly what you need or take our pre-built sector modules.

What's a Custom Collection?

A custom collection allows you to create a library of standards that you need, which means that you're in complete control of the standards you choose. Decide exactly which standards are most important to you and build your own collection. Purchase a minimum of 10 credits and add standards to your collection as and when you need them.

What's a Pre-Built standards module?

We've grouped together our standards by subject to give you the complete set of standards on that specific area, rather than choosing them individually. Each pre-built standards module contains thousands of individual standards.

Alternatively, you can subscribe to our pre-built modules and then add a custom collection to pick and choose other essential standards from the wider BSOL library or take the full collection of standards within BSOL.

BSOL has over **100,000** standards, in **53** pre-built sector modules.

What our customers say

BSOL gives easy access to standards we need to use regularly but also enables us to find other standards of interest to us

Standards have been developed by consensus from businesses world-wide, they give good guidance which can be followed to solve any issues

Excellent resource and one-stop shop for checking and ensuring the organisation is aligned to necessary standards.

The features available with BSOL:

Miss nothing with Tracked Changes

Get an alert whenever a standard changes. Keeping up with what's relevant and monitor what has changed can be a struggle, which is why we've introduced personalized individual and group email alerts, and Tracked Changes documents into BSOL. Tracked Changes is a version of a standard that indicates a change has been made, during the standards revision process, between the active standard and its previous version. Additions, deletions, and other formatting and/or content revisions are clearly displayed as underlined and strike through texts, ensuring all changes made between the two documents are quickly and easily identified.

Inclusion of internationally recognized standards

BSOL contains British Standards and international and European standards that have been adopted as British Standards. It also includes other standards that haven't been adopted as British Standards as well as PAS, ASTM and ASME

Multiple search options

Access the standards you need quickly with our search functionality. Search by standard number, status, date, industry sector, national committee, subject (ICS category) or publisher.

Reduce risk

Track past, present and future changes. With access to historic and emerging standards, you can see the guidance that informed previous decisions, as well as changes that could shape your future moves.

Evolve at your own pace

Whichever standards you choose, you can still set up alerts and access all the bibliographic data from every standard in the system – so you can update your choices at any time.

Free and unlimited training

BSOL is easy to use, but our training team are here to give you extra support if you need it.

Password Manager

Password Manager gives BSOL customers easy access to our products by securely saving, remembering and auto-filling your password.

Document request for Custom Collection subscribers

A Custom Collection subscription allows the administrator to add standards (at any point through the subscription year) to the custom collection, up to the level of collection size, quickly and efficiently.

These are only some of the unique features BSOL has to offer to improve your efficiency when working with standards. **Reduce risk within your organization and instil trust with your clients with BSOL.**

Why BSI?

Standards offer guidance on an agreed way of doing something and are built with industry knowledge. Standards help guide businesses and individuals to accelerate innovation and define success. British Standards are created by global industry experts, with vast knowledge and experience in their fields. The role of BSI is to facilitate bringing these people together, to agree on best practice and to create standards. BSI brings together every aspect of society, to deliver, through consensus, independent, robust, and expert best practices a vast collection of documents that enhance innovation, productivity, sustainability, and safety.
