

# Key Elements of Auditing ISO 55001: 2014

## What is it?

ISO 55001 Asset Management is the new standard which supersedes PAS 55. The key difference between the two is that whereas PAS 55 focused on physical assets only, ISO 55001 reflects a consideration of all types of financial, physical and organizational assets. If your organization has multiple assets at the heart of its' business, you will know that an effective management strategy should contribute to better operating results, performance and improving your bottom line.

## Why do I need it and who should attend?

This one-day course provides a solid foundation in key aspects of the audit process. You will be taken through a structured programme including a balance of theory and practice using a combination of collaborative learning and practical activities. Key guidance will be given and practical experience in planning, executing, and reporting asset management system audits. Those coordinating internal audit activities, or leading management systems audits against ISO 55001 will find this course useful, along with those wishing to refresh their asset management audit skills.

## How will I benefit?

This course will help appropriately trained auditors to bring value to the audit process. You will learn how to conduct more efficient and effective audits against the requirements of the standard, so your organization will be better placed to achieve and maintain compliance with ISO 55001.

## What will I learn?

Upon successful completion of this course, you will be able to:

- Explain the principles of auditing to ISO 55001:2014
- Introduce and apply a four theme approach to assessing the elements of ISO 55001 and their integration
- Prepare and conduct asset management audits
- Recognize the role of maturity models for continual improvement in asset management
