Be a step ahead of everyone else!

About BSI

BSI is the business standards company that helps organizations all over the world make excellence a habit. For more than a century we have been challenging mediocrity and complacency to help embed excellence into the way people and products work. That means showing businesses how to improve performance, reduce risk and achieve sustainable growth. As a global leader in helping organizations improve, our clients range from high profile brands to small, local companies in 150 countries worldwide.

We are the UK's National Standards Body (NSB) and were the first national standards body. We represent UK economic and social interests across all European and international standards organizations and in the development of business information solutions for British organizations of all sizes and sectors.

BSI's role as the UK's National Standards Body

BSI is recognized as the UK National Standards Body (NSB) by the UK Government.

Standards Outlook 2014

We're pleased to announce the publication of our second annual standards development briefing, this year called '[Standards Outlook 2014](#)'.

At BSI we believe that standards matter. We see huge potential for voluntary, market driven standards to power innovation and growth, strengthen businesses and to deliver better social, economic and environmental outcomes for all.

The briefing provides a snapshot of the breadth and depth of our standards development work over the past year – reaching all sectors and types of organization both large and small – and the impact that this has had. Standards Outlook also looks forward to the work that we'll be doing in 2014 and beyond which will influence, shape and develop the standards that support UK business and society, as well as the global business standards that these go on to become. And our case studies provide compelling evidence of the value of this work.

Our work continues to be diverse and varied: from our research into the role that standards could play in helping to maximize the benefits of offshore renewable energy, to the development of our first standards for [smart cities](#) which will help to transform the efficiency and sustainability of urban communities. We're also working with Government, the Technology Strategy Board and Research Councils to create new standards for new technologies and services including synthetic biology, cell therapy and assisted living, which will also help drive and stimulate innovation in these areas.

...making excellence a habit.™

Programme Sponsorship

Sponsorship Package

Thank you for taking the time to review our proposal and considering BSI for sponsorship of this milestone event.

Following the success of our event in Dubai we are now bringing the same experience to Doha, where BSI shall shed some light into the changes being made to three of the worlds most adopted management systems standards.

- ISO 9001:2008 will change to ISO 9001:2015
- ISO 14001:2004 will change to ISO 14001:2015
- OHSAS 18001:2007 will become ISO 45001:2016

And BSI, as a national standards body has the expertise to bring the latest information on what changes are being made, what changes are likely to be made, and how this will impact organizations which are certified, looking to be certified, or part of a supply chain.

Sponsorship is needed to cover the costs of bringing this event to Qatar, and we are seeking only a select few companies to help in this regard.

Sponsorship is fixed at QAR 10,000 for which your company shall have 3 delegates passes and also have your logo displayed on our presentation slides, e shots, flyers, as well as all other marketing collateral.

To Confirm your sponsorship,
please call +974 4029 9001 or
Email us: julie.haddad@bsigroup.com
