...making excellence a habit.™

About BSI

BSI is the business standards company that helps organizations all over the world make excellence a habit. For more than a century we have been challenging mediocrity and complacency to help embed excellence into the way people and products work. That means showing businesses how to improve performance, reduce risk and achieve sustainable growth. As a global leader in helping organizations improve, our clients range from high profile brands to small, local companies in 150 countries worldwide.

We are the UK's National Standards Body (NSB) and were the first national standards body. We represent UK economic and social interests across all European and international standards organizations and in the development of business information solutions for British organizations of all sizes and sectors.

BSI's role as the UK's National Standards Body

BSI is recognized as the UK National Standards Body (NSB) by the UK Government.

Standards Outlook 2014

We're pleased to announce the publication of our second annual standards development briefing, this year called ['Standards Outlook 2014'](#).

At BSI we believe that standards matter. We see huge potential for voluntary, market driven standards to power innovation and growth, strengthen businesses and to deliver better social, economic and environmental outcomes for all.

The briefing provides a snapshot of the breadth and depth of our standards development work over the past year – reaching all sectors and types of organization both large and small – and the impact that this has had. Standards Outlook also looks forward to the work that we'll be doing in 2014 and beyond which will influence, shape and develop the standards that support UK business and society, as well as the global business standards that these go on to become. And our case studies provide compelling evidence of the value of this work.

Our work continues to be diverse and varied: from our research into the role that standards could play in helping to maximize the benefits of offshore renewable energy, to the development of our first standards for [smart cities](#) which will help to transform the efficiency and sustainability of urban communities. We're also working with Government, the Technology Strategy Board and Research Councils to create new standards for new technologies and services including synthetic biology, cell therapy and assisted living, which will also help drive and stimulate innovation in these areas.

...making excellence a habit.™

British Standards Institution Group
ISO Revision Events
Four Seasons Hotel

ISO 9001, ISO 14001 and OHSAS 18001 will be updated
Be a step ahead of everyone else!

Doha – State of Qatar

Event Overview:

Three of the world's most implemented standards are due to be revised in the next year or two.

ISO 14001 (Environmental Management Systems) and ISO 9001 (Quality Management Systems) are currently being revised and are due to be published in 2015.

A new ISO standard, ISO 45001 for an occupational health and safety management system is being produced in 2016. The standard will be aligned with ISO 9001 Quality Management and ISO 14001 Environmental Management.

To help you understand more about these changes, BSI is welcoming you to attend the ISO Revisions Seminar.

The event aims to update you on the progress and how the changes may affect your business. It will give you an insight to changes arising as a result of the adoption of Annex SL (Appendix 2), and latest revision requirements.

The event will help you:

- Understand the transition requirements
- Prepare for ISO 9001:2015, ISO 14001: 2015 audits
- Identify the key envisaged changes to ISO 9001, ISO 14001 and ISO 45001
- Clarify the purpose and use of Annex SL Appendix 2
- Discover how to optimize the value from your standards

Who should attend:

- Organizations that are currently certified to ISO 9001:2008, ISO 14001: 2004 and OHSAS 18001: 2007
- Organizations currently developing systems for certification to ISO 9001, ISO 14001 and OHSAS 18001
- Experts and professionals in Management Systems Standards
