# Building Information Modelling

Building Information Modelling (BIM) is the process of creating, managing and sharing structured information to allow for greater collaboration and better built projects.

BIM is revolutionizing the way the construction industry manages its assets. By ensuring everyone in the supply chain shares information in a collaborative way, BIM encourages the use of a consistent management framework that helps mitigate costs and delays.

It is effective information management in a team environment, where everyone aspires to work to the same standards. Essentially, BIM creates value from the combined efforts of people, process and technology. It allows those who work within BIM to optimize their actions - resulting in greater overall value.

## Changing the face of construction

The global construction industry is increasingly becoming more critical to a country's growth and economy. From sustaining local businesses to providing the infrastructure they need to compete on an international level.

The benefits of BIM can be seen in the operational phase of buildings and infrastructure of those already utilizing the process; creating a workforce that is more efficient, competitive and forward-thinking.

With the UK leading the way and demonstrating the clear cut benefits of digital construction technology, other countries will soon follow in its footsteps. For the global construction industry, this presents an exciting opportunity to embrace change, increase productivity and secure new contracts worldwide.

To ensure you make the most of this opportunity, our new BIM training courses provide the knowledge and practical skill to help you get ahead.

## Pioneers of leading-edge learning

As the world's first National Standards Body and a founding member of ISO, no one knows standards like BSI.

We've been working with government and industry to develop BIM standards that facilitate more efficient data interoperability and you can download these for free from the BSI Shop:

<http://shop.bsigroup.com/BIM>

We know these documents inside out and our training is designed to help you make the most of them.

# Train with the best

BIM is more than just working in a digital environment. It's about ensuring teams have the relevant knowledge and capabilities to achieve best practice and the continued drive to commit to it.

Developed in conjunction with leading industry consultants and trends, our training courses provide the most relevant and up-to-date information in the market. You'll learn how to effectively manage information across all stages of your construction projects.

All our training courses are fully aligned to the Government's definition of Level 2 BIM so you can start delivering projects to meet requirements early. Wherever you are on your journey, whatever your role, we have a course to help you be more efficient at what you do.

## New course range

### BIM Fundamentals

Gain a detailed understanding of the key drivers, requirements and strategic alignment needed to deliver BIM and how it allows you to achieve a faster, more efficient delivery of projects.

### BIM Processes & Procedures

Grasp the key processes and procedures of delivering successful build projects using BIM, in line with UK Government requirements and industry best practice.

### BIM Information Management

Learn how to effectively manage information across all stages of construction projects utilizing BIM.

### BIM Implementation

Develop the knowledge and skill required to effectively implement BIM across your organization and supply chain.

## Which course do I need?

We understand that every project is unique. Depending on your level of involvement, you'll face different challenges and embrace different opportunities. Our training courses provide the relevant information you need, allowing you to get the most out of your training experience.

Course	Duration	Strategic	Management	Operational
BIM Fundamentals	2 days	•	•	•
BIM Information Management	2 days		•	•
BIM Processes & Procedures	2 days		•	•
BIM Implementation	1 day	•	•	•

# Your BIM journey

- 1 Download free standard
- 2 Identify business needs
- 3 Attend BIM training course
- 4 Carry out gap assessment
- 5 Undertake verification
- 6 Achieve BIM certification

## BSI Training Academy

### Our knowledge

We don't just train you to meet standards – we create them. As the world's first National Standards Body and a founding member of ISO, no one knows standards like BSI. Our expert knowledge means a lot and when you train with us, you benefit from this expertise.

### Our tutors

Our tutors are the best in the business. As industry experts, they'll transfer the knowledge you need to embed standards into your organization and develop them through continual improvement.

### Our approach

Our high impact accelerated learning approach is proven to fast-track learning by improving knowledge retention and skill application. Our training courses are activity based, resulting in a deeper understanding of material and greater impact on job performance.

### Your expertise

Our training courses will give you the knowledge and skills to embed the standards that matter to you the most. To promote your professional development, you'll receive a personalized BSI Training Academy certificate that's recognized worldwide.
