

A faster and more  
efficient way to design  
with Eurocodes

Eurocodes PLUS is a digital version of the latest Eurocodes and extended content set, complete with search, save and support functions.

### It's time to consign the 'scrapbook' approach to history.

As an engineer, you need to have all of the latest Eurocodes at your fingertips when you're designing new buildings or structures. Yet finding and cross-referencing the standards the old-fashioned way can be complex, time-consuming and confusing: particularly if you are more familiar with British Standards.

Eurocodes PLUS digitizes all 25,000 pages of the Eurocodes content set, complete with a host of functions to make these essential design standards easier to use and understand than ever before.

It enables you to search for the standards you need, then paste them into your own document, complete with the XML links to all necessary cross-references.

Just as importantly, it provides expert guidance where the Eurocodes allow for a degree of flexibility, and the ability to add your comments to every document, as well as to receive comments from colleagues.

There is simply no better way to organise your notes and optimize your design time.

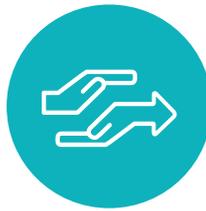

# The Benefits of Eurocodes PLUS at a Glance

## Accessibility:

Simple indexing and search functions enable speedy search and cross-referencing of Eurocodes, including embedded UK National Annexes, Execution Standards, Non-Contradictory Complementary Information (NCCI) and more

## Guidance:

Eurocodes PLUS is embedded with specific guidance provided by industry experts, which is of particular use where Eurocodes leave room for interpretation

## Organization:

Click-through navigation makes it easy to keep your workspace organized, even when working across multiple documents

## Comparison:

A full set of the now withdrawn British Standards is included, enabling you to compare them against the latest Eurocodes

## Creation:

The system enables you to create documents for individual projects, as well as custom documents, enabling even easier access to standards you regularly use

## Collaboration:

The 'Projects' workspace within Eurocodes PLUS enables colleagues to work with you, adding and sharing notes, with a range of access privileges that are set by you

# About BSI

BSI is the business standards company that helps organizations all over the world make excellence a habit. We understand the complexity and competitiveness of the construction industry, and the challenges this brings for companies seeking to improve margins, reduce costs and improve predictability. Whether you're involved in infrastructure or buildings, public,

private or PPP, we understand the challenges you face including managing financial risks, efficient delivery, or meeting legislative or environmental requirements. Plus we recognize the need to find innovative solutions whilst also avoiding project over-runs.
