

Your business is only as good as your supply chain

Put its future in safe hands

Global supply chains are becoming increasingly complex

It is essential to maintain expert management of what are often complex international webs of suppliers, in long chains spanning multiple continents. Otherwise you can be hostage to a whole range of risks that can become too difficult to control - and too late to mitigate.

These can be both seen and unseen risks and include:

- Cargo disruption
- Political instability
- Terrorism
- Counterfeit goods
- Information security
- Natural disasters
- Human rights
- Environmental
- Intellectual property
- Sustainability
- Health and safety
- Product quality

The success of your business is aligned with the success of your supply chain, which means exceptional supply chain management is critical to sustainability and profitability.

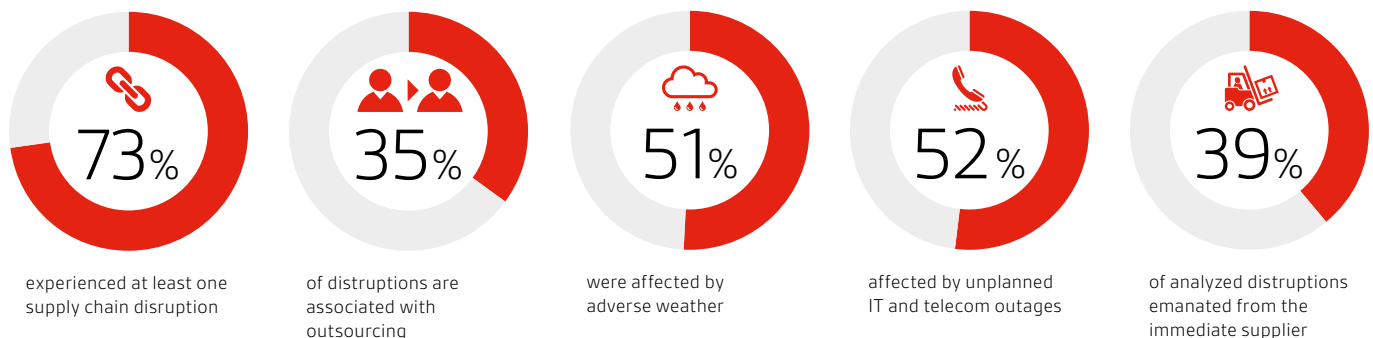

That is why it is imperative to quantify supply chain risk for your team globally, so you can trade with confidence, mitigate risk and build lasting resilience.

Why BSI?

BSI is trusted as a leader in global risk management, with proven expertise and an extensive network of worldwide supply chain specialists who are well placed to help you mitigate risks. This means the risks you are aware of and, just as crucially, the ones you don't yet know about. Our network of experts combined with our supply chain solutions gives us a unique global reach and effectiveness, and gives our clients the reassurance in their supply chain that they need.

Frequency and sources of disruption in supply chain*

...making excellence a habit.™

*Source: BCI Survey, 2011 & 2012 of over 530 organisations who consider origins, causes and consequences of supply chain disruption as well as proven approaches to resilience.

Real world solutions

BSI have a number of supply chain risk management tools and a network of experts around the world to help you manage and mitigate threats in your supply chain:

SCREEN (Supply Chain Risk Exposure Evaluation Network)

The most complete, publically available Supply Chain Security, Corporate Social Responsibility and Business Continuity intelligence and analysis source available. SCREEN is a web based risk portal, which can be accessed from any device.

SCREEN allows you to:

- Tailor reports based on proprietary risk analysis
- View risk-based intelligence at a glance so that you can mitigate risk and ensure business continuity.
- Receive daily intelligence updates straight to your inbox
- See country risk ratings instantly through detailed risk maps
- Access in depth special reports

VerifEye

VerifEye allows you to vigorously examine your suppliers. We undertake second-party on-site audits to validate and report on your suppliers activities, giving you a complete picture of your suppliers along the chain; highlighting weak links and potential risk points.

VerifEye provides:

- Comprehensive reports and invaluable observations and recommendations
- Benchmarking and performance improvement
- Corrective action support
- A local BSI expert auditor (in more than 150 countries)
- Customized audit based on the internal requirements of your company.

SCM (Supplier Compliance Manager)

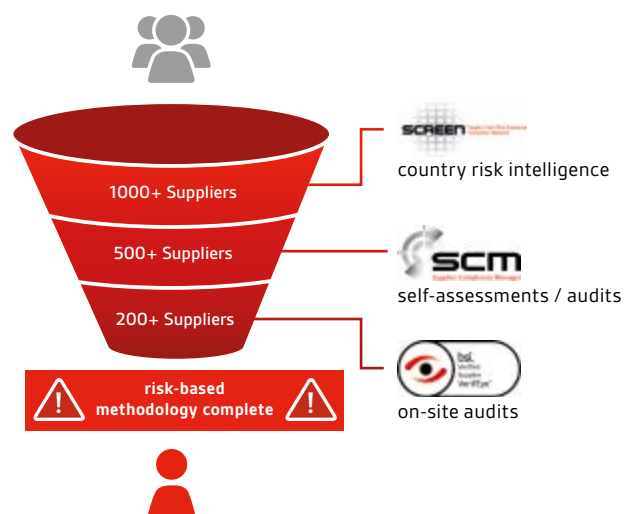

SCM provides a centralized administrative hub that collects supplier information in order to map and assess supplier risk, manage compliance and deliver continuous improvement.

SCM allows you to:

- Manage self-assessments and the on-site audit process
- Have instant access to risk-based supplier profiles and ratings
- Manage your supplier intelligence in one place, through a web-based automated system
- Manage and track corrective and preventative action to closure
- Visually map supplier locations globally and classify high-risk suppliers

Greater visibility for smarter spending

Focus your financial investment where you have the greatest risk. Our risk based intelligence portal helps you assess who in your supply chain poses the greatest risk to your organization. You can make informed decisions about where to focus your risk based analysis and invest in conducting audits where the biggest threats are likely to occur.
