CE marking

CE marking is simply a declaration from manufacturer that the product complies with ALL RELEVANT European Directives.

CE marking on a product indicates that the minimum levels of quality and health & safety have been met and helps the product to move freely throughout the European Single Market.

May 2014.

PAS 99

Management systems help you to get more from your organization. And integrating these management systems allows you to get even more without investing extra time or money.

PAS 99 is the world's first specification for integrated management systems. Many of our customers asked for one framework to manage all of their certified systems. So we developed PAS 99 using the ISO guide for writing management system standards – giving you a world-class framework to work with.

June 2014.

ISO 9001

An ISO 9001 quality management system will help you to continually monitor and manage quality across all operations. With ISO 9001 you can put in place processes that allow you to improve the way you operate at all levels.

Manage quality whatever the size of your business with a standard that's recognized the world over. And you can:

- save money
- increase profit
- win more business
- satisfy more customers.

ISO/IEC 27001

Information is a valuable asset that can make or break your business. When properly managed it allows you to operate with confidence.

ISO/IEC 27001 is the international standard for information security management. It outlines how to put in place an independently assessed and certified information security management system. This allows you to more effectively secure all financial and confidential data, so minimizing the likelihood of it being accessed illegally or without permission.

23-24 Jul Hazard and Operability (HAZOP) Training Course

Oil and Gas - Training Courses :
14-18 Jul NEBOSH International Oil and Gas Certification Course

August 2014.

ISO/IEC 20000

Companies of any size rely on effective IT service management. No matter where you're based or what you do, your IT services need to be cost effective, reliable, consistent and efficient.

ISO/IEC 20000 is the first internationally recognized standard for IT service management. The standard outlines how to implement IT services that are driven by and support business objectives – rather than just technology needs.

ISO 22301

Understand and prioritize the threats to your business. ISO 22301 specifies the requirements for a management system to protect against, reduce the likelihood of, and ensure your business recovers from disruptive incidents.

ISO 22301 is the international standard for business continuity management. It's designed to protect your business from potential disruption. This includes extreme weather, fire, flood, natural disaster, theft, IT outage, staff illness or terrorist attack. And it allows you to put plans to ensure your business doesn't come to a standstill.

November 2014.

ISO 50001

Effective energy management isn't just good for business, it's also becoming a requirement. And the best way to achieve it is with ISO 50001.

ISO 50001 outlines the best way to achieve energy efficiency, whatever the nature of your business. The standard will help you meet your environmental and carbon reduction targets as part of improved energy performance. It shows you how to take a structured approach towards measuring and monitoring how much energy you use – helping you to get more from less.

ISO 14001

Put environmental management at the heart of your operations to achieve sustainable success.

ISO 14001 is an internationally accepted standard that outlines how to put an effective environmental management system in place. It is designed to help businesses remain commercially successful without overlooking environmental responsibilities. An ISO 14001 system provides the framework to allow you to meet increasingly high customer expectations of corporate responsibility.
