

ISO 14001:2004, Lead Auditor IRCA Certified

Course Description

EMS auditors are at the forefront of maintaining environmental standards and require a high level of expertise. Who better to provide this than BSI? We help to develop international standards and monitor evolving methodologies and best practice in the auditing of Environmental Management Systems (EMS).

This five-day residential course trains delegates to a high level of proficiency in EMS auditing methodologies and develops their awareness of ongoing development in this field.

Course Structure

Interactive sessions, role play and workshops are based on recent case histories, ensuring that the skills and methodologies transferred are current best practice and are relevant to real life situations.

- Requirements of ISO 14001 / EMAS
- How to Assess Environmental Impacts
- Environmental Legislation
- Analysis of Processes
- The Assessment Process
