

Internal Auditor ISO/IEC 27001

(Information Security)

Play a pivotal role in your company's success by becoming a qualified ISO 27001 internal auditor today. We can help you take the next stage of your information security management journey with our Internal Auditor Training Course – and you can ensure your business is protected with an ISO 27001 compliant Information Security Management System (ISMS). Unrivalled in understanding and delivering key competencies needed to build a robust ISMS, we can offer expert training and advice with our internationally recognised qualification. This two day course provides you with the skills to effectively assess and manage your security policies and processes.

How will I benefit?

- Be confident that you have internal audit expertise to protect your company's data
- Ensure your information security management system is ISO 27001 and internationally compliant
- Demonstrate to your stakeholders that your information security is managed to the highest standard
- Raise your company profile with an internationally recognised ISMS benchmark
- Encourage continuous employee professional development

Who should attend?

This course is designed for those with an understanding of ISO/IEC 27001:2005. Our qualified trainers will help you to gain a solid understanding of all audit activities. We will guide you stage by stage from theory to practical exercises, helping you to put your knowledge into action.

What will I learn

- Learn how to use ISO 27001 to carry out effective information security management audits
- Identify the different stages of the audit process and how to put each into practice
- Learn how to initiate and prepare an audit
- Gain confidence in conducting and managing the entire audit process
- Learn how to finalise the audit and complete required follow-up action
