

Implementing Risk Management – ISO 31000:2009

- Course Description** Organizations that recognize the importance of managing risk can benefit from implementing a formal risk management system. BSI's 1-day course on implementing risk management will guide you through the development of a framework to effectively manage your organization's risks.
- After completion of this course, you will be able to apply the principles of risk management to your organization and implement a risk management framework and process suitable to your organization.
- BSI's Implementing Risk Management course uses lectures, discussions and hands-on exercises to effectively achieve learning objectives.
- Course Benefits**
- Increased business resiliency structure
 - Change management capability
 - Ability to implement a risk management framework
 - Enhanced business continuity and stability
- Learning Objectives** Upon completion of this training, participants will be able to:
- Specify the components and process of building a risk management framework
 - Specify the structure and flow of the risk management process
- Intended Audience** This course is intended for managers and prospective implementers of risk management, and for stakeholders in such efforts.
- Course Duration** Implementing Risk Management is a 2-days course.
- Prerequisites** This course requires a basic understanding of the rationale and structure of ISO 31000 such as that provided by BSI's Understanding ISO 31000 course.
