Section 2: Assessment Process

BSI is a leading global provider of management systems assessment and certification, with more than 80,000 certified locations and clients in over 190 countries. BSI Standards is the UK's National Standards Body. BSI provides independent, third-party certification of management systems.

Assessment Methodology, Programme, Site Visits

This remote assessment was conducted from 6-10/9/2021. The audit programme is included in Section 2.3. The approach to the audit was to treat SPOC Q10 - Betong & Spaoh as a MSPO Certification Unit with a total of 735 smallholders. A range of environmental and social factors were covered. This includes consideration of topography, palm age, proximity to areas with HBVs, declared conservation areas and local communities.

This remote audit has been conducted using Information and Communication Technologies including Microsoft Teams, WhatsApp and Google Drive. The planned audit objectives have been achieved, and there were no connectivity issues which adversely effected the audit.

The methodology for collection of objective evidence included virtual site inspections, observation of tasks and processes, interviews of staff, workers and their families and external stakeholders, review of documentation and monitoring data. MS 2530-2:2013 were used to guide the collection of information to assess compliance. The comments made by external stakeholders were also taken into account in the assessment.

The smallholder's sample were determined based on formula $S = r\sqrt{n}$ where n is the number of estates while when applicable, the smallholders' sample were determined following the MSPO Certification Requirement. The sampling of smallholders was based on the formula $(r\sqrt{n})$; where r is the risk factor (may defers 1, 1.5 and 2 depending on risk), where n is total number of group members. As for the SPOC Q10 Betong & Spaoh ASA 1_1 Assessment, the risk factor used was 1.5 (medium risk) which was due to the additional 136 New Members. Based on the formula, 42 smallholders which consist of 11 Existing Members and 31 New Members, were sampled for this assessment. The sampled smallholder is listed (highlighted) in Appendix C.

Virtual meetings were held with stakeholders to seek their views on the performance of the company with respect to the MSPO requirements and aspects where they considered that improvements could be made. At the start of each meeting, the interviewer explained the purpose of the audit followed by an evaluation of the relationship between the stakeholder and the company before discussions proceeded. The interviewer recorded comments made by stakeholders and these have been incorporated into the assessment findings.

Structured worker interviews with male and female workers and staff were held in private via Microsoft Teams in the mill and the estates. Fieldworkers were interviewed informally in small groups via Microsoft Teams as well. Company officials were not present at any of the internal or external stakeholder online interviews. A list of Stakeholders contacted is included as Appendix B.

This report is structured to provide a summary of assessment finding as attached in the Section 3. The assessment was based on random samples and therefore nonconformities may exist that have not been identified.

This report was externally reviewed by MSPO approved Peer Reviewer prior to certification decision by BSI.
