- **91%** of UK adults who recognise the Kitemark believe it gives them a reassurance of quality\*
- Existing Kitemark service licensees quote a business increase of up to **20%**.

## Electrical Contractors

Under Part P of the Building Regulations 2000, all Electrical Contractors in England and Wales must register for a competent persons scheme if they are to avoid Building Control Inspection of their work. Now you can turn this to your advantage, by applying for your competent persons' scheme with the BSI Kitemark, the foremost symbol of quality, reassurance and trust.

As a Kitemark licensee customers will identify you as an accredited installer, totally compliant with current legislation, and with a proven commitment to quality and safety.

By complying with Part P through the Kitemark scheme, your business will share in the high profile of the prestigious Kitemark, helping you to gain the business advantage over your competitors.

Kitemark licence application is available for those contractors meeting the requirements of BS 7671: 2008 working in domestic and/or industrial, commercial sectors. Applicants must undergo thorough assessment, before the Kitemark licence can be awarded.

Whether you are new to Part P, or wishing to transfer from your current scheme, BSI Staff will be on hand to help you through the application process.

## Fire Alarm Installers

The Chief Fire Officers Association now strongly recommends third party certification by a UKAS accredited company, for companies who design, install, commission and maintain fire detection and alarm systems. This now applies to ALL fire detection systems, as of 1st September 2008

Turn this to your business advantage by gaining a Kitemark licence for Fire Alarm Systems. This gives you the recommended certification and the competitive advantage the distinguished Kitemark symbol brings.

The SP203 Kitemark Scheme, recognises that many companies specialise in certain aspects of fire alarm services and this is reflected in the scheme. By using a flexible modular structure, **SP203 will allow your company to gain Kitemark certification in all the scheme modules listed OR just those modules under which you are competent to work.**

The four modules are:

- System Design
- Installation
- Commissioning & handover
- Maintenance

Standards to which you can gain accreditation include: BS 5839 parts 1, 6 & 8 (Voice Alarms); HTM05-B and Gaseous Suppression Systems, (of which BSI is one of only two companies who can offer this), BS 6266, BS 7273 parts 1 & 2 and the BS EN 14520 range of gases and CO<sub>2</sub>.

Kitemark certification for Fire Alarm Systems will reassure your customers of your commitment to delivering consistently high standards.

“The Kitemark scheme is highly trusted and respected, and gaining this award provides our customers with peace of mind. It will enable us to pursue our ambitious growth plans and compete for contracts”

– Alan Wilcox, Managing Director,  
Uni-Guard Fire Protection Limited
