

Approval ~ Kitemark Licence KM 75184.

Result

BSI received no questions during the Notification period.

BSI received no responses, positive or negative, during the Notification period.

Comment

COLT is a Communications Provider.

This is believed to be the first Metering and Billing Approval of a traditional switched Public Telecommunications Operator, since adoption of the Communications Act 2003, that did not attract comments during the Notification period.

BSI assumes the complete process is now fully understood by those given the opportunity to respond during the Notification period.

Summary

COLT has met all the Technical and Administrative requirements of that Approval Scheme and was granted Approval.

BSI concludes that the Approval of the TMBS employed by COLT satisfies both the requirements and the spirit of the Metering and Billing Approval Scheme.

A Kitemark Licence (number 75184) was issued on 13th May 2005.
