NEW FOR 2005!

Electrical Plugs and Wiring and World Electricity Supplies

Your indispensable guide and reference source to electrical plugs, wiring and electricity supplies worldwide!

If you are planning to launch new products, export into other markets, or if you need to check that your products meet the latest regulations and other requirements, then this new publication is just what you need!

Electrical Plugs and Wiring and World Electricity Supplies is a new publication that covers essential information for any manufacturer, exporter or supplier of electrical goods and services. This international survey comes in two main parts.

The first part deals with plugs and wiring that would be used with mains-powered household and similar equipment, operating up to 250V a.c. single phase, with a maximum current rating of 20A. For most of the countries, individual country surveys contain information on plugs, mains cables, sockets for lamps (bulbs) and building wiring codes.

In addition, the book contains a collection of diagrams that illustrates the style of plug used in each country as well as providing the main dimensions. The country pages also indicate which standards and regulations may be applicable to plugs, and the certification requirement and test bodies.

The second part provides useful comparative tables of world electricity supplies, voltages and frequencies.

All domestic, commercial and industrial supplies are included, with some distribution voltages. Both line voltages and phase voltages are given when identifying the circuit diagram of the supply source connections. Supplementary notes provide additional information.

Written and researched by experts

BSI Business Information's team of technical specialists research, compile, write and work with national and international experts in the field to ensure that the information provided in BSI books and guides has been validated, verified and is correct at time of publication. This gives you the confidence to make business critical decisions safe in the knowledge that you have the right information at your fingertips.
