

Career Opportunity

Job Title:	Developer
Vacancy Ref:	12/023
Grade:	Technical Delivery
Salary Range:	From £25K
Dept:	Group IT
Location:	Chiswick

Job Purpose:

The Developer role will be working with existing Developers, Solution Architect, Enterprise Architect and a number of offshore (third-party) developers. You will be involved in development across multiple (virtual) product development teams and your responsibilities will include, but not be limited to, new code development, defect fixing and maintenance of existing code.

Key Result / Areas:

- Participate in project stand-ups and iteration planning.
 - Perform the breakdown of tasks for the user stories assigned to you.
 - Be involved with the Operational team to work on root-cause analysis of problems related to a code defect.
 - Debugging and troubleshooting the source code to identify the error and develop a hotfix.
 - Involved as developer in different virtual development teams.
 - Familiar with test-driven methodologies; you will be writing tests before any line of code to test your architecture.
 - You are excited by new technologies and able to balance properly how new technologies can be used to meet the products and team's objectives.
 - Experienced in software refactoring to increase the quality of the code without adversely impacting the features delivered. You will follow the best practices.
 - Work closely with project teams to ensure common understanding of the technology being used and to validate the appropriate technology platform to be used for a project.
 - Validate testing procedures and ensure that they are applicable to the solution. Ensure that the deliverable is of a high level of quality.
-

bsigroup.com/careers

-
- Identify and utilize technology synergies between projects to maximize use of resources and developments.
 - You are not expected to have direct end-user or customer interaction in your day-to-day job.
-

Candidate Spec

- Bachelors Degree or equivalent in Computer Science or a related numerate field.
- Experience of developing well structured and well commented code in C#.
- Experience of working in software development.
- A good understanding of and design knowledge in service oriented architecture.
- Demonstrates clear and effective verbal and written communication skills with all levels of staff within the business, and contacts outside of the organization, such as Strategic Partners or Vendors.
- An enthusiastic team player, also able to work effectively under their own initiative and bring out the best in other team members.
- Experienced in a test driven development.
- Experience of working in an Agile (SCRUM) development environment
- Any experience of working with offshore third party suppliers, would also be of benefit.
- A willingness to learn new technologies.

Microsoft Development skills

- Proficient in:
 - Visual Studio 2010 development environment
 - C#
 - Visual Studio Unit Test
 - Selenium UI testing
 - .Net Framework 3.5 and 4.0
 - ASP.Net MVC 3.0
 - Windows Communication Foundation
 - Team Foundation Server
 - Advantageous if knowledgeable in:
 - Enterprise Libraries
 - T-SQL
 - SOAP
 - XML, XSL, XML Schema
 - Silverlight and PRISM and composite application
- Any professional certification like MVP, MCPD or MCAD would be an advantage.
