

BSI Training Academy

Advanced Product Quality Planning (APQP) and control plan methodology training course

Essential information about the course

Level **1C 2C 3**

Advanced Product Quality Planning (APQP) is a structured process aimed at ensuring customer satisfaction with new products or processes. It supports the never ending pursuit of improvement which is a key concept in quality management system standards such as IATF 16949.

If you are involved in APQP activities (either as a team member or by leading a team involved in APQP), or if you are involved in the implementation of IATF 16949, then this one-day course could be beneficial for you.

In this course you will learn how important the APQP methodology is in achieving successful production part

approval. You will also gain the knowledge to identify the activities involved in the APQP process and gain the skills to become a productive member of a product quality planning team.

Delegates should already have a good understanding of ISO 9001:2015 and IATF 16949:2016 requirements.

This one-day activity-based course is structured to optimize your learning using our unique approach to accelerated learning.

Our course agenda

Day 1
