IATF 16949:2016 Production Part Approval Process (PPAP) training course

Essential information about the course

Level **1C 2C 3**

Production Part Approval Process (PPAP) is used in the automotive supply chain for establishing confidence in component suppliers and their production processes. Often required by OEM's, it is a process to show your customer that you can consistently make their parts on an on-going basis and minimize the risk of failure. It is one of the Core Tools which form the building blocks of an effective quality management system such as IATF 16949.

If you are involved in the submission of parts to customer(s) for part approval, involved in the Advanced Product Quality Planning (APQP) process, or if you are involved in the implementation of IATF 16949, then this one-day course could be beneficial for you.

In this course you will learn how to identify PPAP submission requirements including those which are customer-specific. You will also gain the knowledge to determine documented information to be retained and retention times.

Delegates should already have a good understanding of ISO 9001:2015 and IATF 16949:2016, and ideally will have already completed our Core Tools training course which this course builds on.

By using our unique approach to accelerated learning, this one-day activity-based course is structured to optimize what you learn.

Our course agenda

Day 1

- Course aims, learning objectives, and structure
- The product approval process in IATF 16949:2016
 - Submission of PAPP
 - Customer specific requirements
- Process requirements
 - PAPP process requirements

Upon successful completion of your course, you'll receive an internationally recognized BSI certificate.

IATF 16949:2016 Production Part Approval Process (PPAP) training course.

We want to make sure you have the best learning experience possible. That's why we offer a range of training courses from beginner to expert. We create a positive learning environment so you retain the knowledge and acquire skills that will continue to be of use beyond the course.

Make sure this is the right course for you.

This is the course for you if:

- You are responsible for the submission of parts to customers for production approval
- You are involved in the APQP process
- You are involved in the implementation of IATF 16949
- You have already completed our IATF 16949:2016 Core Tools training course

What is the course like?

- One day long
- Led by a BSI expert tutor
- Relaxed and comfortable learning environment
- You'll receive detailed course notes to take away

How will I benefit?

- You will understand the purpose of the Production Part Approval Process (PPAP)
- You will understand when customer notification and submission is required
- Develop professionally
- Network with likeminded peers
- Receive a BSI certificate

Why invest in training from BSI?

When you attend a BSI training course, our tutors are the best in the business. They're truly passionate about sharing their knowledge and ensuring you learn. Trusted experts with years of hands-on and business experience, they bring the subject matter to life with relevant and contemporary examples.

Training delivered at your site

This could be a convenient and cost effective option, especially if you have multiple delegates.
