

# Energy Management training

## Introduction to ISO 50001 Energy Management

### What is it?

The international standard ISO 50001 Energy Management is regarded by many as the best practice framework to manage your energy performance and address your energy costs. It can also help you to reduce your environmental impact and meet emissions reductions targets. It provides a structured approach towards measuring and monitoring how much energy you use. ISO 50001 also drives technical and behavioural practices in pursuit of improved energy performance.

### Why do I need it?

If you are unfamiliar with ISO 50001, this course will provide a context, structure and content for the standard. It is suitable for the complete beginner and those familiar with ISO 14001 Environmental Management Systems wishing to understand the differences to ISO 50001.

This course will provide you with the fundamentals of ISO 50001, enabling you to make the most of future courses relating to Energy Management

### What will I learn?

This one-day course will help you understand the concept of energy management systems and enable you to:
