Lean Six Sigma

Is 99% good enough and what does 1% mean?

Many organizations would be more than happy with 99% efficiency. However, Lean Six Sigma drives companies even further than this. What does that extra 1% look like for organizations like yours?

120 million aluminium cans which could be recycled per year

10 million incorrect medical prescriptions issued each year

3.5 million litres of water saved per day from broken pipes in the UK

806,000 tonnes of office waste which could be recycled per year

153,424 Unprocessed Direct Debits each day

11,254 cars recalled in the UK per year

240 delayed trains per day in the UK

6,246 UK flight passengers losing baggage per day

54,797 delayed flights per year

806,000 tonnes of office waste which could be recycled

10 million incorrect medical prescriptions issued each year

575,342 letters undelivered by the Royal Mail each day

No electricity for 7 hours per month

54,797 delayed flights per year
