

BSI Action Manager

...Powered by Entropy™ Platform

Successful management and reporting of non-conformities and follow-up corrective actions is core to “Making Excellence a Habit” in managing risk and driving continual improvement in organizational performance.

Reduce costs | Maintain compliance | Analyze trends

Faster Closeout of Actions

Automated, workflow from root cause analysis to close out of actions.

Enhanced Task Management

Automatic notifications + escalations improve actions and task ownerships.

Visibility into Operations

Real-time data on actions and tasks, audit trail history, and version control.

Resource & time optimization

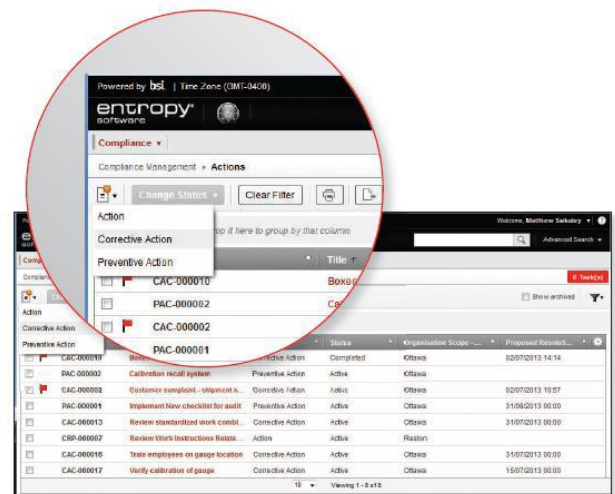

On time follow-up ensures effective controls are implemented with time cost savings.

Effective Compliance

Consistent format for CAPA across people, department and location.

Reporting, Monitoring and dashboards

Simple to use dashboards make data analysis and decision making easier, while scorecards give a rapid visibility into problem areas, department or locations.

...making excellence a habit.

Action Manager – A framework to drive continual improvement

Additional Solutions to drive business improvements

BSI Action Manager is a tool available from BSI Entropy Solution.

Entropy™ consists of five separate modules which include:

1. Compliance Management
2. Risk Management
3. Performance Management
4. Incident Management
5. Knowledge Management

Entropy™ allows you to choose the modules or tools that you need in order to cost effectively deal with areas of your business that cause the most challenges. Entropy™ delivers solutions for a wide range of industry sectors and business challenges.
