### Technical Documentation Reviews for CE Marking

**BSI CE-Excellence Programmes are designed for medical device manufacturers wanting to get their products to European markets efficiently and safely.**

Standard

### CE-Standard

The CE-Standard review service allows you to work closely with your assigned BSI Product Expert on your product certification. These reviews are conducted remotely, with communication between you and your BSI Product Expert via phone and email, as required.

Dedicated

### CE-Dedicated FastTrack

The CE-Dedicated FastTrack review service allows you to book your technical documentation review in advance. The service is conducted remotely with your BSI Product Expert, who uses the time allocated to your company to conduct a focused review of your technical documentation. This allows you to interact with your BSI expert, providing them information during the review. The CE-Dedicated FastTrack service improves the efficiency of the process, and provides predictability in your planning of the review.

Onsite

### CE-Onsite FastTrack

The CE-Onsite FastTrack review service is conducted at your premises; a BSI Product Expert visits the facility for a period of time. CE-Onsite FastTrack reviews allow for dynamic communications and opportunities for immediate responses to questions raised by the reviewer. Planning a CE-Onsite FastTrack review in advance provides you with more predictability and the reassurance of knowing when your BSI Product Expert will be at your premises.

**Note:** Our services do not guarantee a CE Marking certificate will be issued within a certain amount of working days, but are based on completing the review process with either a positive or negative recommendation. CE-Dedicated FastTrack and CE-Onsite FastTrack are not available for devices utilizing animal tissue, blood derivatives or medicinal substances.
