Welcome to the BSI Training Academy

We understand business success starts with people. We've assessed thousands of businesses, so we can genuinely benchmark performance. We've also trained many auditors who carry out these assessments so we can take you from beginner to expert - quickly.

BSI is an industry thought leader in training to international compliance standards. Our training experts provide top quality training to organizations of all sizes and sectors. We're one of the world's leading providers of business improvement training, offering a range of solutions to keep your staff qualified and updated. In 2015, we trained 113,000 people globally and achieved a satisfaction rate of 99.5%.

We aim to be first to market to keep your business relevant and provide you with the opportunity to enjoy first mover advantage by adopting new standards. From understanding how a standard can help your business, to implementing, monitoring and auditing your compliance to that standard, we can support you all the way.

Why train with BSI?

Great businesses need great people

Research shows that when an organization invests in training and development, they reap real rewards:

83% of people feel that staff are the key to maintaining a competitive edge*

45% percent of staff say they'd feel more motivated if their organization invested in **skills training***

Businesses are **2.5 x more likely to fail** if they don't train their staff*

Why training is important

Turn our experience into your expertise

We've shaped the **world's most adopted standards** including ISO 9001, ISO 14001 and ISO/IEC 27001

99.5% of our delegates would recommend us

In 2015 we trained **113,000** people, from SMEs to global organizations

BSI spend **195,000 days** with clients in a year, so we know what businesses want and understand their needs

Collectively, our tutors have over **250 years** experience working with management systems between them

About BSI

How BSI helps organizations embed excellence.

BSI (British Standards Institution) is the business standards company that equips businesses with the necessary solutions to turn standards of best practice into habits of excellence. Formed in 1901, BSI was the world's first National Standards Body and a founding member of the International Organization for Standardization (ISO). Over a century later it continues to facilitate business improvement across the globe by helping its clients drive performance, manage risk and grow sustainably through the adoption of international management systems standards, many of which BSI originated. Renowned for its marks of excellence including the consumer recognized BSI Kitemark™, BSI's influence spans multiple sectors including aerospace, automotive, built environment, food, healthcare and ICT. With over 80,000 clients in 172 countries, BSI is an organization whose standards inspire excellence across the globe.

Since 1901, BSI has been helping organizations improve, capturing best practice and shaping the standards of excellence in product specification, business process and business potential.

BSI works with clients in all fields – ranging from some of the best-known global brands to government organizations, charities and SMEs. BSI's clients want to work with someone who understands the challenges their business is facing and has the skill to recognize where excellence can be achieved.

80,000

Customers worldwide

Training

In 2015, we provided training to 113,000 people worldwide

10,000

Industry experts dedicated to your success

Standards

ISO 9001 QMS which started life at BSI in 1979 as BS 5750, is the world's most successful business standard

Certification

100,000+ business locations certified by BSI globally. Our assessors score on average 9.25/10 in our Client Satisfaction Survey

Product certification

92% of the world's top 25 global medical device manufacturers trust BSI as their notified body

Which course is right for me?

1 Understand

Introduction courses:

Who should attend?

Ideal for new starters or those needing to gain a "refresher"

What will I learn?

An overview of your management system and the standard's requirements

2 Requirements and Implementation

Requirements and Implementation courses:

Who should attend?

Those responsible for implementing, or have recently taken responsibility for a management system

What will I learn?

The requirements of a standard in the context of your company and how to take the lead in planning implementation

3 Prove it's working

Internal Auditor courses:

Who should attend?

Those tasked with conducting internal audits or monitoring their management systems performance

What will I learn?

How to be better equipped to maintain compliance and how to manage and improve risks to your management system

BSI's business improvement solutions can help you in the initial and implementation stages of your journey by:

- Mapping out tasks, procedures and policies to consider when implementing a management system
- A single sharing portal allowing usability across your organization
- Ongoing management and maintenance of your management system

4

Make excellence a habit

Lead Auditor courses:

Who should attend?

Those tasked with conducting and leading management systems audits

What will I learn?

Gain the ability and confidence to conduct and lead effective audits, and how to manage audit teams and processes

Certification:

- Assess your readiness for certification with a gap analysis day
- Maximize your certification with business improvement training and software tools

All our courses are available in-house

Call 1300 730 134

BSI's business improvement solutions will help you prepare for auditing and ongoing maintenance of your management system by:

- Documenting internal inspections and audits in one centralized hub
- Providing an effective tool to manage non-conformities
- Reduced administration by automating actions and tasks

Our values

We deliver five star learning at first class venues. These are selected especially to make sure you learn in the best possible environment with great facilities and refreshments. This way you can focus on and maximize your learning experience.

99.5% of course delegates say they would recommend BSI.

Here are some of their reasons for doing so:

"Experience and breadth of training."

"Excellent tutors."

"Choice of course style."

"Ease of booking."

"Quality course material."

"Reputable venues."

Making excellence a habit

How BSI helps organizations embed excellence

Shape

BSI, together with independent experts, tackles the issues of today and tomorrow by shaping the standards of excellence across products, business processes and business potential.

Share

We share these standards in the format you need for your organization, enabling dynamic integration of digital content.

Embed

Our trainers transfer the knowledge your people need to embed excellence daily.

Assess

Our assessors understand your business and give you proven ways of measuring excellence, so you can promote it confidently to your stakeholders.

Support

Most importantly, we support you with the knowledge and tools you need to recognize excellence and keep excelling... every day.

First class learning

The history of Royal Charters dates back to the 13th century and are granted by the British Monarch on the recommendation from the UK Privy Council. The original purpose of a Royal Charter was to create public or private corporations and to define their specific privileges and purpose.

Our Royal Charter

Today, Royal Charters are given to public service bodies that work for the public interest. On 22 April 1929, the Engineering Standards Committee was granted a Royal Charter. The Charter was amended in 1931 changing the name to The British Standards Institution.

The Royal Charter states our function as a standards body, as well as our ability to offer training, testing and certification services. The Charter also outlines aspects of how we are to be governed, such as; membership, the conduct of General Meetings and the composition of the Board.

Our approach

Within our training courses we use accelerated learning techniques to help you progress naturally and quickly. We encourage interaction and collaboration because the more involved you are, the more positive the outcome.

We also keep the courses varied and put your learning into context to give you an enjoyable, successful and satisfying experience.

Our tutors

Turn our experience into your expertise with our industry leading professionals. Our tutors are recognized as leaders in their field, and have specialist subject experience having implemented the standards themselves. They are trained to understand and meet your different learning needs, and they have years of industry experience.

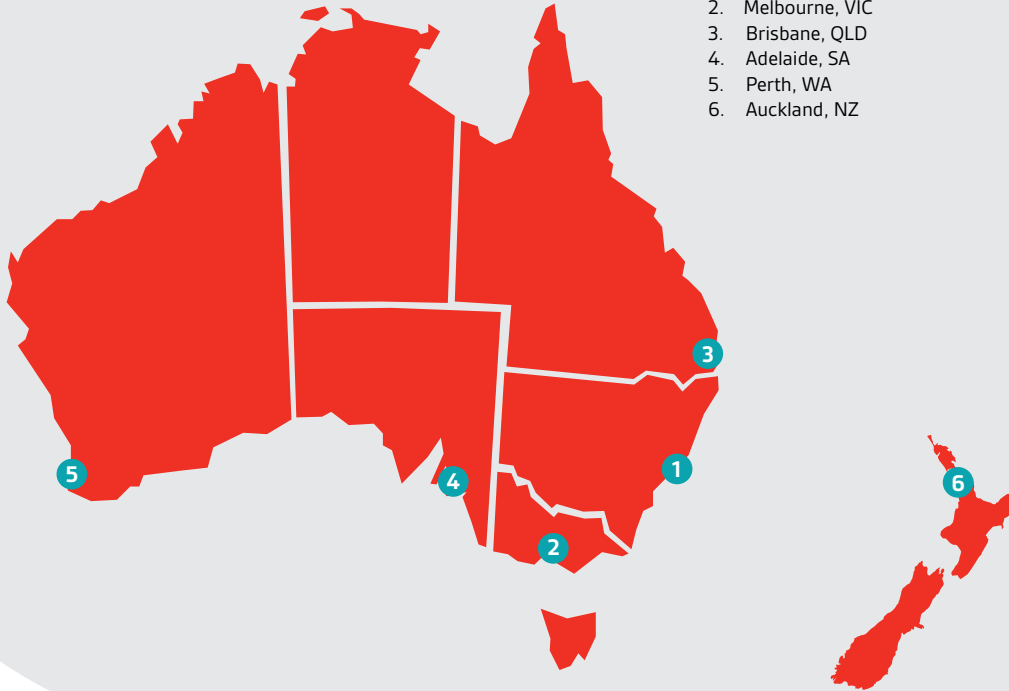

They know what is required in an audit – so they'll train you to meet it. They know the thinking behind the standard – so they can convey that knowledge to drive and inspire your people. It's one of the reasons why our courses have outstanding pass rates and why 99.5% of our course delegates would recommend us.

"BSI really helped me understand the core fundamentals of conducting an effective internal audit and what to expect from an external audit. Our tutor was an expert in the field which really helped put our new found knowledge into perspective."

Jenny Ly, Spotless

Our Venues

1. Sydney, NSW

4. Adelaide, SA
5. Perth, WA
6. Auckland, NZ

In-house training

Designed for you

When you choose BSI In-house training, you can select a course 'off-the-shelf' from our extensive range. You can then ask us to adapt a course to your specific needs, or you can request a completely tailored course to be developed for you.

We will take the time to understand your organization's learning needs so that we can develop a tailored training solution that satisfies your business objectives. Working with you, we'll help to develop your people, improve processes and enhance your systems.

Whichever option you choose, you can be sure that you will be trained by a trainer who has practical experience and who understands your marketplace.

National Recognition

As well as delivering both our diploma pathways as in-house solutions, our Management Systems Internal Auditor course can be delivered on your premises and have nationally recognized units of competence attached to it. Following the course your staff will just need to complete the additional self paced learning and assessment tasks to gain the following units of competence:

Participate in a
Quality Audit
BSBAUD402

Initiate a
Quality Audit
BSBAUD501

Report on a
Quality Audit
BSBAUD504

Exclusive to in-house

All our courses and qualifications can be delivered on an in-house basis, but we also offer many courses exclusively in-house. These include Management Briefings.

Management Briefings

Our half day and one day management briefings give a high level introduction to management systems and the benefits of using standards. Aimed at senior management or board level, the workshops provide an understanding of the strategic benefits of standards and how you can use management systems to achieve your goals.

"The course was very well received.
It was well structured with an optimum
mix of interesting activities to ensure learning."

Jay Nair, Bluescope Steel

Benefits to you

Embed your learning

Our aim is to do more than just deliver the course – we want to embed learning and ensure that your people gain long-term benefits from their training, so that you see the return in your investment in your people

You're in control

You can enhance the effectiveness of your training programme by incorporating a real live audit with the assistance of your trainer – making the course more relevant to you and your business, as well as helping you to avoid possible non-compliance at real audit stage, thus saving you time and resources when fixing problems

Flexibility

BSI in-house training is as flexible and adaptable as it is effective – ensuring that you get the best possible learning experience and retain business as usual efficiency

Exclusivity

Each in-house training session is exclusive to your organization. You can introduce company sensitive or market competitive information into sessions, without commercial compromise

Made to measure

From large blue chip organizations to SME businesses and every type of company in-between, our customers have found that in-company training programmes offer them an exceptionally effective, bespoke training solution. These courses are designed based on the development needs of your workforce which will help retain and attract talent over the longer-term

Cost savings

There are clear cost savings to be made – you save on travel, accommodation expenses and employee's time

"The in-house ISO 14001 Lead Auditor training that BSI provided Barrick Australia Pacific with was very effective. The trainer was extremely knowledgeable and did an excellent job of engaging the participants by balancing theory with practical exercises and real-life examples. BSI was flexible and accommodating to Barrick's specific training requirements which resulted in delivery of a high quality, cost effective session."

Allison Brown,
Barrick (Australia Pacific) Limited

Diploma of Quality Auditing.*

BSB51615

Our new Diploma of Quality Auditing* BSB51615 is designed for anyone who wants to build a career in auditing. You'll gain the skills to understand the entire audit process, report on feedback and facilitate continuous improvement. We'll give you the experience and assistance to take your audit skills to the highest standard. With a nationally recognized qualification you'll gain the recognition to take your career to the next level.

How it works

To achieve the Diploma of Quality Auditing* BSB51615 you just need to complete eight nationally recognized units of competence. Shown below are the units that we have chosen for our professional development pathway.

Attend a four day internal/lead auditor training course in ISO 9001, ISO 14001, AS/NZS 4801 or Food Safety to gain the theory and practical skills to initiate and effectively lead the entire audit process. You'll be assigned a qualified assessor to provide feedback and guidance as you work through self paced learning and assessment tasks. These prove the practical application of the skills you learnt in the classroom

and contribute to seven of the eight associated RTO units of competence. Finally just attend our one day Audit Master Class course and learn how to take your audit skills to the next level. By submitting your final assessment you'll gain the final unit of competence required to make up the diploma. Once a BSI assessor has completed a final review of all your assessments and evidence you'll be awarded your Diploma of Quality Auditing BSB51615.

*The term quality auditing refers to best practice auditing and is relevant for a range of management systems including ISO 9001, ISO 14001, OHS and Food Safety Management Systems.

Complete the assessments and receive the following nationally recognized units of competence:

Our Flexible Approach

From the date of enrollment you have 12 months to complete the Diploma in full. Our flexible modular format means you can spread your training days out, attending the lead auditor course in a variety of ways - from sitting the four days in one, to taking the two day Requirements Course and then adding the four day Internal/Lead Auditor course a later stage. See **page 19** for further details on how our Internal/Lead Auditor courses work.

Recognition of Prior Learning (RPL)

If you've already got significant industry experience and access to the evidence to prove it then we can assess your skills and knowledge through our Recognition of Prior Learning (RPL) pathway. This can remove the requirement of attending our formal training courses.

Speak to our training team on **1300 730 134** for more information.

How to book

You can choose to book for the diploma in full or book for the modules separately. Just choose the Management System Lead Auditor course and the initial dates you'd like to attend from our catalogue and speak to our training team on **1300 730 134** to book. Start your journey to auditing expert today.

Booked together: \$4,285 (GST exempt)

A simple guide to the Diploma of Quality Auditing BSB51615 journey with BSI

Quality Management.

ISO 9001

Our ISO 9001 quality management training is designed for organizations of all sizes and sectors. Our courses will help you continually monitor and manage the quality of your performance across all operations.

You'll learn how to achieve and benchmark consistent output by improving infrastructure, performance, work environment and objectives. By embedding ISO 9001 you'll drive positive customer experiences by achieving consistency in your quality of service.

Introduction to: ISO 9001:2015

Understand the benefits ISO 9001 can bring to your organization and how you can use it to cut costs, boost efficiency and stay ahead of the competition.

Duration: 1 Day

In-house only

"We chose BSI for its professional expertise, the excellence of its trainers and its competitive pricing. In each instance BSI has been responsive to our needs and taken the time to familiarize itself with our operations. Our corporate experience with BSI has been both excellent and smooth, involving a minimum of fuss, and I have no hesitation in recommending them."

Jeremy Alam, Regional Learning Delivery Officer,
NSW Defence Learning Branch

ISO 9001:2015 Senior Management Briefing

This executive session highlights the benefits of an effective QMS and introduces you to the key requirements of ISO 9001:2015. Through this, you'll gain a better understanding of both your organization's obligations and your personal responsibilities. Upon completion, you will be able to develop action plans for implementing key leadership activities.

Duration: Half-Day

In-house only

ISO 9001:2015 Deep Dive

Learn to successfully tackle quality management within the context of your organization. Gain an in-depth understanding of four critical areas of ISO 9001:2015: Process Approach, Risk-based Thinking, External Provision and Leadership.

Duration: 2 Days

In-house only

"The Lead Auditor training I completed with BSI has equipped me with both the knowledge and practical skills to effectively meet the demands of my role."

Carmen Quintana , Manager Quality
NSW West Region, Transfield Services Limited

Did you know?

We trained 113,000 delegates globally in 2015

Flexible Auditor and Lead Auditor Courses.

ISO 9001 • ISO 14001 • AS/NZS 4801 • ISO 22000

Our flexible courses allow you to become an auditor or lead auditor at your own pace.

How it works

After attending one of our two day Requirements courses, you can upskill yourself with modules in Management Systems Auditing and Leading Audit Teams, either immediately or at a later date.

Exams are given at the end of each module and delegates who successfully complete the courses and pass the relevant exams receive a BSI Certificate of Attainment for each of the separate competency units taken.

Valuing both your time and education

- Less time out of the office and more time to implement your classroom learning
- Reduced travel costs
- Exam retakes are taken electronically

Learn at your own pace

Our flexible format gives you different attendance options. Achieve your learning goals with either one or three separate courses, or take all four days together.

Expand your qualifications in just two days

Once you have achieved competency as Lead Auditor in any of our schemes, you only need two more days of a Requirements course to obtain competency as a Lead Auditor in another management system.

Understand the standard with our two day Requirements courses:

ISO 9001 Quality - QM: 2 days
ISO 14001 Environmental - EM: 2 days
OH&S Management - OH: 2 days
Food Safety Management - FS: 2 days

Learn to perform internal and lead audits:

Management Systems Internal/Lead Auditor
AU: 3 day

Asset Management.

ISO 55001

If your organization has multiple assets at the heart of your business, you'll know that an efficient asset management strategy, should contribute to better operating results, performance and ultimately improve your bottom line.

ISO 55001 provides clear guidance on building an asset management system that brings strategy and day-to-day action together, allowing you to run a more efficient business.

Fundamentals of ISO 55001

This interactive course starts with an overview of asset management, what it is and what it can do for an organization. It shares the latest thinking, processes, methods and tools in joined up management of any type of asset.

13-14	June 2017	Sydney
-------	-----------	--------

-------------------------	-------------------------

Key Elements of Auditing ISO 55001

This course provides key guidance and practical experience in planning, executing, and reporting management system audits of asset management. This innovative, one day course provides a solid foundation in key aspects of the audit process. Delegates are taken through a structured programme that includes a balance of theory and practice using a combination of collaborative learning and practical activities.

23	May 2017	Melbourne
16	June 2017	Sydney
01	August 2017	Melbourne
21	November 2017	Sydney

Duration: 1 Day	\$935 (inc GST)
------------------------	------------------------

ISO 55001 Requirements

The effective management of assets is becoming increasingly important to organizations and their interested parties. This comprehensive one day course explores in depth the organizational implications of the international standard for Asset Management, ISO 55001. The aim of this course is to explain the main requirements of ISO 55001 and its organizational benefits.

22	May 2017	Melbourne
15	June 2017	Sydney
31	July 2017	Melbourne
20	November 2017	Sydney

Duration: 1 Day	\$935 (inc GST)
------------------------	------------------------

"The training is an absolute necessity and well worth the time and money. Having auditors also deliver the training means you don't just understand the mechanics of the standards, you get an insight into interpretation of the standards, making it easier to apply them to your organization."

Kai Zauner-De Ville, External Accreditation Project Officer
Centacare South West NSW

Your training journey to get the best out of your management system:

1

Getting Started

Understand the Standard and it's benefits.

2

Implementing

Use best practice tools to implement the Standard.

3

Auditing

Develop your expertise to assess the effectiveness of your system and lead teams of auditors.

4

Improving

Improving performance of your system and advancing your knowledge and skills with full qualifications.

Audit Master Class

This one day intensive course is suitable for auditors of any discipline. The course will introduce you to a variety of auditing approaches and refresh and enhance your communication skills during audits. This course makes up part of the BSI Diploma of Quality Auditing BSB51615 – see pages 14-15 for further details.

Complete the assessment and receive the following nationally recognized units of competence:

Use complex workplace communication strategies

Internal Auditor: ISO 13485:2016

Learn more about the responsibilities of an ISO 13485 auditor and how your business can maintain compliance, and get the most out of your certification. The course covers the entire audit process, giving you the skills to effectively plan, prepare and conduct an audit, and the confidence to report on audit results and lead corrective follow up actions.

20-21	March 2017	Melbourne
05-06	June 2017	Sydney
14-15	August 2017	Melbourne
06-07	December 2017	Melbourne
13-14	December 2017	Sydney

Duration: 2 Days

\$1,985 (inc GST)

Lead Auditor: ISO 13485:2016

Review ISO 13485 and build on the principles of process auditing in accordance with quality management system standards. Work with our training experts to understand the entire audit process at the lead level from planning, to managing and reporting on audit results. Learn about the concepts of risk management (ISO 14971) and its integration with the audit approach.

03-07 July 2017 Sydney

Duration: 5 Days **\$4,835 (inc GST)**

Introduction to: CE Marking

Gain an introduction to the Medical Device Directives (MDD, AIMDD, IVDD) and understand their background and key features. On completion of this course you'll be able to make informed decisions on meeting the requirements of medical device directives, identify the steps required to reduce the risks in the regulatory process and bring products to the EU market much quicker.

17 March 2017 Sydney
23 June 2017 Sydney

Duration: 1 Day **In-house only**

Medical Devices CE Marking

Become confident in understanding the legal and operational aspects of European regulatory and standards principles to ensure your devices quickly meet safety quality standards. Learn how to identify risks and report product changes to ensure the quality and safety of your products.

Duration: 3 Days **In-house only**

Introduction to: CE Marking for the In Vitro Diagnostics Directive

Gain an introduction to the In Vitro Diagnostics Directive (IVDD) covering its background and key features. Understand the entire audit process so you can go on to develop IVD quality products, meet safety standards, gain EU market access and maintain compliance throughout the lifecycle of your products.

Duration: 1 Day **In-house only**

Application of the In Vitro Diagnostics Directive

Learn about the In Vitro Diagnostic Directive regulatory and standards principles, so you can ensure you're manufacturing to regulatory requirements and developing safe and effective devices.

Duration: 3 Days **In-house only**

Creating and Maintaining Compliant Technical Files and Design Dossiers

Learn how to locate and identify regulatory requirements and guidance documents to write procedures and maintain compliant technical files and design dossiers that will help you to sell your product within the EU.

Duration: 1 Day **In-house only**

Clinical Evaluation for Medical Devices

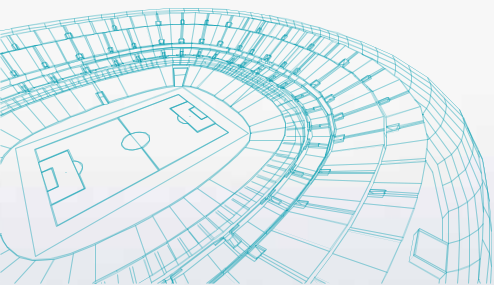

Learn what information is necessary to demonstrate clinical safety of products in accordance with the requirements of the European Medical Devices Directive and the Active Implantable Medical Devices Directive.

Duration: 1 Day **In-house only**

Building Information Modeling.

BIM

Building Information Modeling or BIM is all about collaboration in a common data environment. Some of the key benefits to gain from our training include developing faster and efficient processes, increased productivity, controlled costs and environmental data, and avoidance of rework costs.

BIM Fundamentals

Gain a detailed understanding of the key drivers, requirements and strategic alignment needed to deliver Building Information Modeling (BIM) and how it allows you to achieve faster, more efficient delivery of infrastructure.

Duration: 2 Days

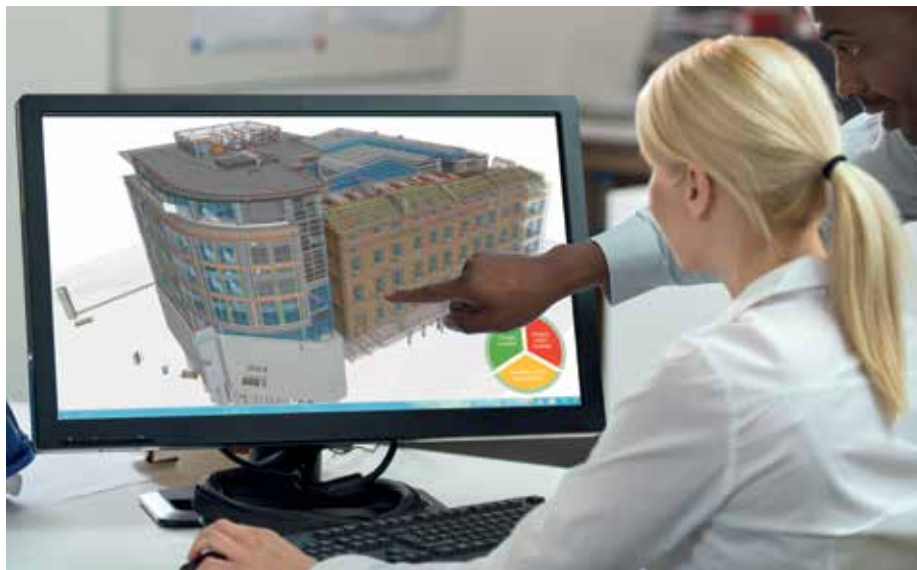

In-house only

BIM Implementing

Develop the knowledge and skill required to implement Building Information Modeling (BIM) across your organization and supply chain. This course provides the knowledge and skills you need to successfully manage each step of your building project.

Duration: 1 Day

In-house only

"The course was extremely well structured and its interactive nature enabled participants to share and learn from individual experiences. The trainer was also extremely knowledgeable and capable of presenting the information in an enjoyable manner."

Annie McClement, Hostworks

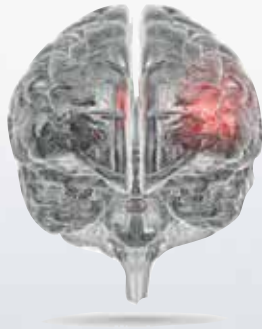

Medical Devices Risk Management.

ISO 14971

Our ISO 14971 Risk Management training is essential for all medical device manufacturers.

You will learn how to identify, evaluate and control risks associated with medical devices throughout the product life-cycle. We can help you implement a risk management framework to achieve ongoing compliance.

At the end of this training you will take away the tools to confidently manage risk to an international standard.

Medical Devices Risk Management: ISO 14971

Our ISO 14971 risk management training is an essential and international accreditation for all medical device manufacturers. You will learn how to identify, evaluate and control risks associated with medical devices throughout the product lifecycle, helping you implement a risk management framework to achieve ongoing compliance. At the end of this training you will have the tools to confidently manage risk to an international standard.

03-04 April 2017 Sydney

Duration: 1 Day \$1,385 (inc GST)

Post Market Surveillance and Vigilance

Learn about the requirements of the European medical device directives (90/385/EEC, 93/42/EEC, 98/79/EC), standards and guidance documents to enable effective implementation of a post-market surveillance system.

Duration: 1 Day In-house only

Device - Drug Combinations: Practical Guidance on Borderline Issues and the Consultation Process

Learn about European legislation for borderline products, and gain insight into further information and guidance related to the distinction between medical devices and medicinal products. Understand the ancillary medicinal substance consultation process, and find common problems encountered by manufacturers during this process. This course also examines devices incorporating derivatives of human blood or plasma.

Duration: 1 Day In-house only

In-house Training
Discuss your product development in confidential surroundings by opting for tailored in-house training

Business Continuity.

ISO 22301

Our ISO 22301 business continuity management training will help you prepare your business for the most challenging circumstances.

You'll learn how to put in place the necessary framework to protect critical business functions from the threats most likely to impact your organization, including damage to your premises, extreme weather conditions and IT system failure.

Introduction to: ISO 22301

Learn the key concepts of business continuity, understand the main benefits of a Business Continuity Management System (BCMS), and gain an overview of the requirements of ISO 22301.

Duration: 1 Day

In-house only

Implementing: ISO 22301

Using a step-by-step process, this comprehensive course helps delegates understand the requirements of ISO 22301. It covers the fundamental disciplines needed and the methods that should be applied when implementing Business Continuity Management Systems.

Duration: 2 Days

In-house only

ISO 22301 Lead Implementer

Bring best-practice risk management to your organization with our ISO 22301 Lead Implementer training course. Learn how to establish a Business Continuity Management System (BCMS) within your organization and clarify roles and responsibilities during disruption.

Duration: 5 Days

In-house only

Internal Auditor: ISO 22301

Learn how to conduct an internal audit of your Business Continuity Management System to the requirements of ISO 22301. Establish the effectiveness of your system and gain valuable insight into the operations of your organization.

The course covers every part of the audit, giving you and your team the skills to plan, conduct and report on an audit, and the confidence to maintain certification.

Duration: 2 Days

In-house only

Lead Auditor: ISO 22301

Learn how to lead a team to prepare for and conduct an independent audit of a Business Continuity Management System to the requirements of ISO 22301.

Our IRCA certified course will give you the confidence to plan and lead the entire audit process. Our trainers are the best in the business and can help you understand how to get the most out of your system.

Duration: 5 Days

In-house only

Crisis and Incident Management

Learn the theory and practical aspects for dealing with a variety of incidents. This course is aimed at those who are tasked with managing an incident.

Duration: 2 Days

In-house only

Information Security.

ISO/IEC 27001

Threats to valuable customer data and business information are now more prevalent than ever. With our information security management training you'll gain confidence in the protection of your company's data.

You'll learn how to measure and reduce information security risks, and understand the principles of setting up your own information security management systems to deliver customer confidence and reduce your exposure to the implications of breaches.

Introduction to: ISO/IEC 27001

This comprehensive one-day course explores in depth all of the business implications of the international standard for ISO/IEC 27001 Information Security Management.

Cloud Security.

STAR Certification

Cloud computing is growing rapidly, and as more and more organizations use cloud services, there is increasing pressure on Cloud Service Providers (CSPs) to demonstrate that they can be trusted to keep user information and data safe. By achieving STAR certification, CSPs can show that they comply with the fundamental security principles outlined in the Cloud Security Alliance's Cloud Control Matrix (CCM) – and importantly for reassuring users – that this has been independently assessed.

Introduction to the Cloud, Security and STAR Certification

This one day course will provide an insight into the fundamentals of cloud computing, its advantages and disadvantages, whilst providing an insight into how the CSA STAR certification model will work and how it can help you to decide if you wish to outsource your services to the cloud.

Duration: 1 Day

In-house only

Auditing Cloud Security for STAR Certification

Learn how to audit a cloud service provider's cloud security, assessing compliance with the Cloud Security Alliance (CSA) Cloud Control Matrix (CCM) and determining a maturity level for their security controls.

Duration: 2 Days

In-house only

Did you know?

64% of organizations believe the cloud provider has primary responsibility for protecting data.

BRC 3rd Party Auditors - Issue 7

This course will ensure that prospective auditors to the BRC Global Standard for Food Safety (issue 7) have an in-depth and practical understanding of the format and requirements of the Standard, the protocol for the audit and actions following the audit.

The course will also focus on developing the soft skills identified in the Global Food Safety Initiative (GFSI) auditor competencies guide – the scheme developed by the GFSI to manage food safety auditor competencies underpinning all GFSI benchmarked standards.

Duration: 2 Days

In-house only

BRC Auditor Conversion - Issue 6 to Issue 7

This course will provide you, as a BRC Issue 6 Auditor, with all of the skills you need to audit against BRC issue 7. This course will give you an in-depth look at the Issue 7 requirements and will highlight the differences between Issues 6 and 7.

Duration: 2 Days

In-house only

Implementing the BRC Global Standard - Issue 7

This course, run by our expert food assessors, will teach you how to implement the BRC Standard in your organization. You'll learn about each of the clauses of Issue 7, and how you can use the methodology to keep your manufacturing processes safe.

Duration: 1 Days

In-house only

We're Australia's leading food safety certification provider, with extensive auditing capability to conduct integrated audits for a wide range of Food Safety standards across the entire food and beverage supply chain - including GFSI recognized standards.

Our service solution for food safety includes certification, training, assessment, and supply chain solutions - providing you and your customers assurance and enabling you to manage risk more effectively.

We deliver training across the entire Food Industry:

Agri-food

We have a wide range of training courses to help you grow and farm your produce in a sustainable, safe and ethical manner.

Food Manufacturing

From Good Manufacturing Practices to Allergen Management, we have the training solutions to help you ensure the food you manufacture is safe and high quality.

Food Service

With our diverse range of Food Service training courses, we can train you to keep the food you serve safe and ensure that your reputation and brand is kept in-tact.

Food Retail

We have a wide variety of training courses, tailored to all manner of retailers, to ensure that you can easily and effectively source your products and services to supermarkets and grocery stores.

Logistics and Storage

It's vital that the food that you store and transport is handled and kept safely. We have a number of training packages to ensure the safe storage and transportation of food and food by-products.

Wholesale/Export

It is imperative that you manage your liability and risk when brokering, exporting and importing goods. We have a number of training courses to help you mitigate risk and manage your supply chain.

Allergen Management and VITAL Online

Understand how you can manage allergies in manufacturing and how you can use the VITAL tool to assess the potential impact of allergen cross-contact and present allergen advice consistently.

Anti-Bribery.

BS 10500

An Anti-Bribery Management System (ABMS), based on BS 10500, will provide your organization with a framework for prohibiting, preventing, detecting, reporting and dealing with any bribery that does occur. It takes into account the requirements of the UK Bribery Act 2010 and internationally recognized good practice.

Commercial organizations based in Australia could be liable for prosecution if they carry out business in UK, even if this is a minor part of their organization.

Our BS 10500 training courses have been developed in association with the City of London Police, Economic Crime & Fraud Training Academy and will teach you how to protect your business, defend your reputation and mitigate the risk of bribery and associated costs.

Anti-Bribery Management System Requirements of BS 10500

Learn the concepts of anti-bribery including the key requirements and context of BS 10500 and understand the benefits of an ABMS.

Duration: 1 Day

In-house only

Anti-Bribery Management System Implementing BS 10500

Learn how to implement an effective ABMS with practical exercises, group activities and class discussions.

Duration: 1 Day

In-house only

Understanding Bribery and Effective Due Diligence

Learn about the nature and impact of bribery, its harm, the risk it poses to organizations and the methods used to identify risk through an effective assessment.

Duration: 2 Days

In-house only

Anti-Bribery Management System Internal Auditor BS 10500

Learn the knowledge and skills required to undertake an internal audit against the requirements of BS 10500 for an ABMS.

Duration: 2 Days

In-house only

Anti-Bribery Management System Lead Auditor BS 10500

Learn the knowledge and skills required to lead an audit system assessment of an ABMS; with the emphasis on developing your ability to conduct second party assessments of suppliers and subcontractors.

Duration: 5 Days

In-house only

BSI Action Manager.

Powered by the Entropy™ Platform, BSI Action Manager is suitable for managing internal and external audits. Automate all of your corrective action and preventative action (CAPA) findings and action plans in a fully-automated and controlled environment providing visibility and timely follow-up.

Powered by Entropy™

- **Closeout of actions** - automated workflow from root cause analysis to close out of actions
- **Enhanced task management** - automatic notifications and escalations improve actions and task ownerships
- **Visibility into operations** - real-time data on actions and tasks, audit trail history, and version control
- **Resource and time optimization** - on time follow-up ensures effective controls are implemented with time cost savings
- **Effective compliance** - consistent format for corrective actions across people, departments and locations
- **Reporting, monitoring and dashboards** - simple to use dashboards make data analysis and decision making easier, while scorecards give a rapid visibility into problem areas, department or locations
- **Low cost, subscription pricing** - we make it even easier for companies to gain visibility into operational performance

Road Traffic Safety Management.

ISO 39001

Our Road Traffic Safety (RTS) Management training will help you to understand the agreed industry standard aimed at targeting the reduction of death and serious injury in road traffic incidents. The new standard urges organizations to demonstrate their commitment to the safety and welfare of employees and the general public to reduce road traffic risks.

Our ISO 39001 courses are aimed at organizations of all types and sizes but will be of particular interest to those operating fleets of vehicles, road constructors and maintains and organizations that create demand for road traffic, such as retailers and public services.

Introduction to: ISO 39001

Discover the key features and benefits of Road Traffic Safety (RTS) Management Systems and how it can help your organization reduce or eliminate road traffic accidents.

Duration: 1 Day

In-house only

Internal Auditor: ISO 39001

Develop the knowledge and skills to conduct effective audits by using appropriate tools and techniques when auditing Road Traffic Safety (RTS) Management Systems. Ensure that you are consistently evaluating your RTS performance and that you are driving continual improvement.

Duration: 2 Days

In-house only

Implementing: ISO 39001

Using a step-by-step process, this comprehensive course covers all the fundamental disciplines needed and the methods that should be applied when implementing Road Traffic Safety (RTS) Management Systems.

Duration: 2 Days

In-house only

Lead Auditor: ISO 39001

Gain the skills and knowledge to conduct and lead effective Road Traffic Safety (RTS) Management Systems audits to the requirements of ISO 39001. Using practical exercises, group activities and classroom discussions you'll learn how to manage a team to plan, conduct, report and follow up an audit.

Duration: 5 Days

In-house only

"The training team, administrative staff and BSI are always happy to help find a course or package that suits your needs. I keep coming back to BSI for my ISO training, as they consistently deliver interesting, well structured and well executed courses. I leave the course feeling confident I have met my learning objectives and clearly understood the topics to be able to effectively implement the subject matter into my organisation and share my knowledge with my team."

Kristine Lawler
Quality Advisor
Australian Maritime Safety Authority

Energy Management.

ISO 50001

Our ISO 50001 Energy Management Systems (EMS) training will help you understand how to use, develop and manage policies and procedures to improve your energy efficiency, achieve targets, and reduce costs.

We can help you create awareness and embed a culture of best practice when managing energy across your organization, allowing you to reduce your impact on the environment.

- ResMed Limited

Sustainable Events.

ISO 20121

ISO 20121 lays out a management system that helps you improve the sustainability of your event. It has been designed to help you manage sustainability throughout the entire event management cycle.

Our climate is changing with potentially substantial implications for governments and industries. The events industry is no exception. Anyone involved in organizing and managing events needs to understand these trends, the implications on their businesses and then implement strategies to allow their business to respond in a more sustainable way. To help you understand and successfully implement ISO 20121 in your organization BSI have developed a suite of training courses.

Introduction to ISO 20121

Learn the concepts of sustainability and the relationship between sustainability and events management. This course covers issue identification and evaluation, legal requirements, how to design stakeholder engagement programmes and setting objectives and targets.

Duration: 1 Day

In-house only

Implementing: ISO 20121

Gain the expertise to design, install and maintain a sustainable management system that meets all the requirements of ISO 20121 and deliver measurable benefits. This course includes an in-depth examination of what is required for certification to the standard.

Duration: 2 Days

In-house only

Internal Auditor: ISO 20121

Gain the expertise to design, install and maintain a sustainable management system that meets all the requirements of ISO 20121 and deliver measurable benefits. This course includes an in-depth examination of what is required for certification to the standard.

Duration: 2 Days

In-house only

Benefits of in-house training

- Cost effective
- Delivered at a venue of your choice
- Tailored to suit your specific needs
- Ideal for training a larger group
- Flexible

"BSI's Training Academy helped us understand Internal Auditing and how we can embed it within our organization. With the knowledge and expertise of their expert tutor we significantly improved our audit process."

Nadine Belleair, ATSICHS – Mackay

The certification process with BSI

10 steps to achieving certification to a management system.

Step 1

Buy the standard

To understand what is required from your organization and begin preparing for implementation, you'll need a copy of the standard.

Step 2

Contact us

We can discuss what you need and recommend the best services for you. We'll help you identify ways to improve your business performance. We'll then give you a proposal detailing the cost and time involved.

Step 3

The application

Completing the application is a formal recognition of your organization applying for certification with BSI.

Step 4

Make sure your staff have the necessary skills and tools to implement a management system

Our range of training courses will help your staff understand your objectives and the roles they will need to play. Our Business Improvement Solutions provides the tools that support management system implementation. Tools available help you effectively manage core areas of a management system including document control, issues and corrective actions, audit and findings and much more.

Step 5

Your assessment team is appointed

Your dedicated Customer Care Advisor will be in touch to talk you through the process. You will also be appointed a Client Manager with appropriate industry experience to ensure you are always getting the most from your certification.

Step 6

Gap Analysis to make sure you are on track

We can carry out an optional Gap Analysis - also called a pre-certification assessment. It looks at the existing processes and procedures that you have in place and compares these with the requirements of the standard. This will help you identify any omissions or weaknesses that need resolving before formal assessment.

Step 7

Assessment – Stage 1

At the Stage 1 assessment, the implementation and understanding of your management system is reviewed, and the planning for the remainder of the certification process is discussed.

Step 8

Assessment – Stage 2

This is the final assessment. Stage 2 confirms your management system is fully aligned to the standard and is fully operational within your organization. We'll evaluate the implementation and its effectiveness, and make a recommendation for your formal certification.

Step 9

Achieving your certificate

Celebrate your success internally and externally - Once you have certification, it's essential that you promote your achievement. Use your new BSI Assurance Mark as a valuable marketing tool to promote your certification, offering your company a competitive advantage.

Step 10

Make excellence a habit with BSI

Your Client Manager will visit you regularly to help you make sure you remain compliant, and support you in the continual improvement of your systems. We will communicate with you regularly to keep you updated with any events, training courses and products that could maximize the benefits of your management system.
