

Road Safety Seminar 2017

13 December 2017 (Wednesday)

TIME : 2:30 – 5:00 pm (Registration starts at 2:15pm)

VENUE : Unit 1202, 12/F, Cheung Lee Commercial Building, 25 Kimberley Road, Tsim Sha Tsui, HK (adjacent to Mira Place 1)

MEDIUM: Cantonese

CPD : 2.5hours

FEE : Complimentary

Road incidents are some of the most severe incidents that can occur. With the significant number of more than 400 injuries and death in HK, and approximately 260,000 people death in China as a result of road incidents on average each year, reducing commercial vehicle incidents on the road is of paramount importance.

With this situation, BSI will hold a seminar to review the major factors that contribute to the traffic accidents figures in HK and China and also the possible solution that may help reducing such factors. The Road Safety Management System standard ISO 39001 was launched in 2012 which is the initiative of UN and BSI has participated in creating the standard. The standard is now a known state of the art standard that deemed appropriate for helping to resolve some of the keys issues that contribute to the road incidents. In the seminar, our professional speakers will share their knowledge about the interpretations and applications of the standards' requirements etc.

Enrol now to have a comprehensive understanding on the ISO 39001's requirement on minimizing risk and addressing the public concerns about the best practice on road safety management system.

Highlights

- ✓ Identify key concepts of ISO 39001
- ✓ How Road Traffic Safety (RTS) management fits into your organization
