Whilst fire compliance requirements may be similar from region to region, there are still obligations that remain specific to certain geographies. At BSI we recognize that this can be a challenge for you, especially when trying to introduce your fire detection or suppression products into new markets in the most timely and cost-effective manner.

We help companies worldwide and we understand the time, cost and effort it can take to get your products certified to a multitude of global standards. With our global notified body status and UKAS certified laboratories, we not only offer market access routes into the UK, Europe and the Middle East but we can now combine testing and certification services to Australian and New Zealand standards along with European and ISO standards into a single programme.

By working with us as a single provider of your combined global certification requirements, your on-going costs will be reduced as we can combine all audits into a single activity saving you money on an on-going annual basis.

BSI product certification through its testing and certification services in the UK and its BSI Benchmark Certification operations in Australia and New Zealand can offer you BSI Kitemark and BSI Benchmark certification as well as CE marking services.

The BSI Kitemark™ is a mark of quality, safety and trust used for many fire products across the globe. As an internationally recognized mark of quality, safety and reliability, the BSI Kitemark enhances manufacturers reputation, boosts customer confidence and proves compliance across the globe.

The BSI Benchmark™ is a powerful marketing tool which works around the world as a global passport to help you gain access to new markets. It's a registered certification mark, highly recognized and respected as a symbol of quality and safety. A product bearing this mark symbolizes that the product complies with the appropriate Australian, New Zealand and/or International Standard (AS/NZS).

CE marking on a product indicates that the minimum legal requirements have been met and allows the product to move freely throughout the European Single Market. As a Notified Body, BSI have the expertise to help manufacturers understand what their responsibilities are, and will provide the third-party evidence you need to be able to affix a CE mark to your products.

BSI – your global market access partner

Fire products certification for New Zealand

...making excellence a habit™
Fire standards testing and certification we offer:

- **Commercial fire detection products** testing to AS 1603 series, AS 4428 series, AS 7240 series and NZS 4512 standards (similar to the European EN 54 and ISO series of standards)
- **Domestic smoke alarms** to AS 3786 (similar to EN 14604 and ISO 12239)
- **All types of fire extinguishers** – aerosol, portable and wheeled to AS/NZS 1841 series of standards, AS 4265 and AS/NZS 1850 for the fires and testing (similar to EN 3)
- **Fire protection for mobile and transportable equipment** to AS 5062
- Other **fire suppression products** such as fire blankets (AS/NZS 3504), layflat hoses (AS 2792) and hose reels (AS/NZS 1221) can be accommodated for testing and certification for both AS/NZS standards and equivalent EN standards
- **Emergency lighting** to AS/NZS 60598-2-22 and the equivalent EN and IEC standards which aligns with AS 2293 series of standards
- If you have test reports, we can undertake Gap Analysis between the AS/NZS ISO and EN standards to determine test programmes needed to cover additional certification requirements needed

**Benefits of working with us:**

- We have built a global reputation, having tested and certified fire products since 1960
- We are a notified body recognized by the European Commission for 15 European Directives/Regulations, supporting you in your global market access journey
- We offer testing and certification in fire suppression and detection against a broad range of international standards
- Our services are recognized by specifiers, manufacturers and consumers globally
- Our distinguished marks of trust help customers differentiate their products and provide a competitive edge.
