

Advanced Cloud Security Auditing for CSA STAR Certification

Course Description

In conjunction with the CSA, BSI has developed the CSA STAR Certification scheme to measure the robustness and performance of cloud security. It gives cloud service providers the ability to prove that their registration to the Cloud Security Alliance's (CSA's) Security, Trust and Assurance Registry (STAR) has been independently assessed against the new CSA STAR certification maturity model. Led by an experienced tutor, this advanced course covers the 1 day "Auditing Cloud Security for CSA STAR Certification" programme before concentrating on how a CSA STAR rating is determined using a detailed case study on day 2.

Course Benefits

By attending this course delegates will learn how to effectively prepare a cloud service provider for a CSA STAR audit and have sufficient knowledge and skills to conduct 1st and 2nd party audits.

Learning Objectives

Day 1

- Define the criteria for STAR certification
- Describe the CCM and how it relates to ISO/IEC 27001
- Define the specific control areas of the CCM and differentiate between them
- Explain what maturity is and how the STAR certification maturity model works
- Demonstrate how to apply the maturity model when auditing a provider's security controls

Day 2

- Apply the maturity model when auditing a provider's security controls
- Calculate a maturity score for each CCM control area
- Derive a provider's maturity level from the maturity scores
- Demonstrate how to recommend STAR certification

Intended Audience

- ISO/IEC 27001 qualified auditors or those with equivalent knowledge and experience
- Network security managers
- Information security consultants
- Cyber Security principals
- IT Risk and Security managers

Course Details

Berlin, 19/11/2015 – 20/11/2015
9 am - 5 pm

Prerequisites

ISO/IEC 27001 audit qualification or equivalent experience

Further Information

To successfully complete this course, the examination at the end of day 2 must be passed

Price

€1,250.00 (excl. Tax)
