

## BSI Training Academy

# AS/EN/JISQ 9100:2016 **Transition** training course

### Essential information about the course

Level **1 C 2 C**

The 9100 series of standards (9100, 9110 and 9120), the globally recognized quality management series of standards for the aerospace sector, is changing. Organizations currently certified will need to transition to the new versions by 14 September 2018.

If you need to make the transition to the updated standard then our two-day Transition Training Course will help you to explore

the changes so you are well-placed to start your transition journey. Once you have attended this course you will be able to identify gaps in your current Aerospace Quality Management Standard (AQMS) which will help you to plan the process.

**“The course was very informative and enjoyable and I can’t recommend the BSI trainer enough as a tutor and an AS 9100 expert.”**
