BSOL: Continuous Improvement

BSOL content enhancements 2016/17

5,199

additional standards are now available to ensure you are adopting the latest methods and best practices.

£529,040

worth of content has been added, shared across all of the 53 modules.

More international standards added to BSOL

- ✓ BSOL now contains over 12,000 current **ASTM International standards**. ASTM's leadership in international standards development is driven by the contributions of its members: more than 30,000 of the world's top technical experts and business professionals representing 150 countries. ASTM documents are now available for subscription purchase via BSOL either through custom collections, or through ASTM volumes.
- ✓ BSOL now contains over 800 current **IEC standards** which have earned worldwide acceptance and are used by many regulators in their legislation as a benchmark for safety. IEC documents are available on BSOL through custom collections that allow you to pick the standards that are most applicable to you. IEC module subscriptions are also available through add-ons as part of existing BSOL modules.

Enhanced functionality and features to improve BSOL

- ✓ Did you know you can add annotations to PDF documents which you have downloaded from BSOL? Once you have downloaded the document you can add your own explanatory notes and highlight text for useful review or annotation. The marked-up document can be stored online and accessed for reference whenever needed.

Coming soon

- ✓ Group email alerts to send notifications to multiple users about changes to important standards

Enhancing BSOL

BSOL has increased in both value and content across multiple industries

£26,500

Worth of new standards added relating to **Sciences and Healthcare**

£18,267

Worth of new standards added relating to **Environment, Wastes**

£13,172

Worth of new additional standards relating to **Aircraft and Aerospace Engineering**

£10,950

Worth of new additional standards relating to **Textiles, Leather & Clothing**

163

New **Fire, Accident & Crime Prevention** standards added worth £16,171

212

New **Telecommunications** standards added totalling £24,808

141

New **Construction** standards added worth £12,102

£37,847

Worth of **Information Technology – Software & Networking** added

137

New standards added worth £14,227 in **Occupational & Personal Safety**

£12,220

Worth of new **Domestic Equipment & Appliances** content through the addition of 149 standards

132

New **Road Vehicle Engineering** standards added worth £12,514

£10,950

Worth of additional standards relating to **Civil Engineering**

Contact your account manager today to find out how you can add the new standards to your collection.

A full list of additional content can be found overleaf.
