

## BSI Training Academy

# IATF 16949:2016 **Senior Management** Transition briefing

### Essential information about the course

Level **1C**

The globally recognized quality management standard for the automotive industry, ISO/TS 16949, is changing. It is being replaced by IATF 16949:2016 which is published by the International Automotive Task Force (IATF). Organizations currently certified will need to transition to the new standard by 14 September 2018.

As a leader, your support is crucial to the success of your organization's transition. That's why we have developed our

new two-hour Senior Management Briefing which will help top managers identify and manage their responsibilities with regards to the new standard.

The course is fully interactive and led by our expert tutors who have years of experience of working in the automotive industry. It will give you the confidence to understand the key elements of the new standard so that your organization can plan a smooth and effective transition.

**"Our company learns something new each audit. I was very impressed with the auditor's knowledge and expertise. They express the standard in terms we could all understand."** Truck-Lite Co. LLC, US-based vehicle lighting manufacturer

### Our full course agenda helps you understand what to expect:
