

### <u>Construction Product Regulation -</u> <u>Questions & Answers for Clients</u>

#### Introduction

The existing Construction Products Directive (CPD) will be withdrawn on the 30<sup>th</sup> June 2013. From April 2011 it has been in the process of being replaced by the Construction Products Regulations (CPR). The CPR will require all construction products with harmonised European standards in Europe to affix the CE marking to this Regulation.

As a BSI client you need to be aware of the differences between CPD and CPR and what you have and have not to do by 30<sup>th</sup> June 2013.

## What is the Declaration of Performance (DoP)?

This is the key document you need to complete for your product. This takes the place of the Declaration of Conformity under the CPD. The format of the Declaration of Performance (see attached) must follow the Model within the Construction Products Regulation Annex III.

You need to give this document a unique identifier. This may be alpha, alpha/numeric or numeric. This is very important as it links in your CE Marking.

The DoP can be stored on a website but this should be linked to the CE Marking. If requested you must be able to supply this as a paper document.

On this document under item 7 you can refer to your EC certificate with its current number e.g. 0086-CPD-555555. The notified body number for BSI being 0086.

From April 2011 you have been able to create a DoP. However, you must issue a DoP by 30<sup>th</sup> June 2013 to affix CE Marking to your product

# Do I need to have my current EC Certificates issued by BSI changed to the Certificates detailed in the CPR?

There is no legal reason required for you to change an EC Certificate issued against the CPD from BSI as this will be still valid under the CPR. The EC Certificate will be valid until such a time as your product changes, the standard changes, or your manufacturing location changes, or your Factory Production control systems changes in such a way as to require recertification.

### What is the earliest time BSI can issue certificates to the CPR?

Like all notified bodies in the European Union, BSI can only issue Certificates under the CPR from 1 July 2013. From this date BSI Certificate numbers will follow the number designation e.g. 0086-CPR-555555. From this date (1 July 2013), BSI can no longer issue new certificates under the CPD. When your EC certificate needs changing from 1 July BSI will issue the certificate under the CPR and hence change the number (i.e. change the CPD to the CPR in the number) and certificate to the CPR.

#### **How do I Affix CE Marking?**

From April 2011 you have been allowed to affix CE Marking on your product following the CPR. From the 1 July 2103 all products placed on the market must follow the CPR Article 9 which has been reproduced below:

Article 9

# Rules and conditions for the affixing of CE marking

- 1. The CE marking shall be affixed visibly, legibly and indelibly to the construction product or to a label attached to it. Where this is not possible or not warranted on account of the nature of the product, it shall be affixed to the packaging or to the accompanying documents.
- 2. The CE marking shall be followed by the two last digits of the year in which it was first affixed, the name and the registered address of the manufacturer, or the identifying mark allowing identification of the name and address of the manufacturer easily and without any ambiguity, the unique identification code of the product-type, the reference number of the declaration of performance, the level or class of the performance declared, the reference to the harmonised technical specification applied, the identification number of the notified body, if applicable, and the intended use as laid down in the harmonised technical specification applied.
- 3. The CE marking shall be affixed before the construction product is placed on the market. It may be followed by a pictogram or any

other mark notably indicating a special risk or use.

The major changes from the CPD are:

- Use of the DoP number as the number on the CE Marking
- 2) The option of use an identification mark allowing identification of the name and address of the manufacturer easily and without any ambiguity.
- 3) Removal of the requirement to use the Certificate number issued by a notified body
- 4) The year now relates to the year of first affixing the CE Marking under the CPR and not as the CPD which related to the particular year the product was placed on the market
- 5) The identification of the notified body through use of their number which for BSI is 0086

You may find Distributors of your product requiring you to use CE Marking under the CPR before 1 July 2013 to lower their legal risks.

#### **How can I use The BSI Kitemark** ?

From 1 July 2013 all your products and your competitors will have to bear CE Marking for the manufacturer's use against the intended use of the manufacturer as defined within the ZA Annex of the harmonised technical specification.

This will make it hard for consumers and specifiers to distinguish between products on the market by quality.

The BSI Kitemark<sup>™</sup> can help you differentiate your products. For example if you want to meet the uses of the consumer and claim different characteristics in addition to the essential characteristics in the ZA Annex. The BSI Kitemark<sup>™</sup> can also be used if you wish to claim a higher level of Assessment and Verification of Constancy of Performance than given within the standard.

The Kitemark<sup>™</sup> is a very powerful certification mark and can give you access to markets beyond the European Union such as the Middle East, China and Australia. BSI also provides Benchmark certification for the Australian market which is the equivalent of The Kitemark<sup>™</sup>.

If you have any further question please ask your BSI Certification Manager and they will be happy to help.
