

# Extend your reach to global markets

## The BSI Kitemark™ Schemes for Luminaires, Self-ballasted LED Lamps and Emergency Lighting

As an internationally recognized mark of quality, safety and reliability, the BSI Kitemark enhances your reputation, boosts customer confidence and proves compliance – not only in the UK, but across the globe.

The BSI Kitemark is a mark of quality, safety and trust, and used more and more for lighting products across the globe. Products bearing the BSI Kitemark have been tested on an on-going basis over and above the minimum legal requirements to ensure standards do not slip or change over time. BSI now offers Kitemark Schemes for Luminaires, Self-ballasted LED Lamps and Emergency Lighting. With no other similar certification programmes currently available, it is the right step to help you expand and get access to new markets abroad.

The BSI Kitemark is not just recognized and demanded in the UK; it has high levels of global recognition, particularly in regions such as the Middle East where it is one of a small number of Certification Marks accepted by the UAE Civil Defence for lighting.

### The ENEC European Certification Scheme

BSI is a member of the ENEC European Certification scheme for lighting which is widely recognized and demanded throughout Europe within the Electrical product sector, especially in the area of public sector procurement. That means we can help you enhance your reputation in an industry where performance and reliability are critical to ensure safety. We can also help you gain international approvals, so you can make the most of opportunities to sell into new markets and grow your business.

### The International IECEE CB (Certification Bodies) Scheme

We are also a member of the internationally recognised CB Scheme offered by the IECEE – which can give your products widespread access to other markets around the world, based on local product evaluation.

All test certificates issued within the scheme will be recognised by approximately 60 National Certification Bodies, and over 140 Certification Body Testing Laboratories in 43 countries located across America, Europe, Asia, Australasia and Africa. And, even in non-member countries, CB Certificates are often accepted, so you could sell more and enter new markets.

Our laboratories are UKAS accredited, providing testing, mandatory or voluntary certification and compliance wherever your business is located. By testing your luminaires and lighting products with BSI, you'll be able to:

- Save money on duplicate reports as CB reports are recognized in 43 countries
- Save time as your test reports demonstrate compliance for global markets
- Sell more as it's easier to access international markets.

...making excellence a habit.™

## Why BSI?

We are the business standards company that equips businesses with the right tools and solutions to turn best-practice standards into habits of excellence. With over 3,000 staff worldwide, we help our clients drive performance, manage risk and grow sustainably.

Founded in 1901, we were the world's first National Standards Body. Now over a century later, we're globally recognized as a champion in best practice. We have been and still are responsible for originating many of the world's most commonly used management systems standards and publish nearly 2,700 standards every year. These standards are developed to address the most pressing issues of today, such as clear billing, energy management, disability access, nano-technology and more.

All our standards are underpinned by a collaborative and rigorous approach perfected over decades. We always work closely with industry experts, government bodies, trade associations, businesses of all sizes and consumers to develop standards that drive excellence.

We currently work with over 80,000 clients in 172 countries worldwide to help them adopt and cultivate continuous habits of best practice. We also train all our clients and provide them with practical implementation guidance, as well as a comprehensive suite of compliance tools. And to ensure our clients get the very best service, we're also independently assessed and accredited globally by ANAB (ANSI-ASQ National Accreditation Board) and 26 other accreditation bodies throughout the world, including UKAS (United Kingdom Accreditation Service).

Our reach is global and we play a key role within the International Organization for Standardization (ISO). As one of the founding members, we help make sure international standards developed address today and tomorrow's business and societal needs, while delivering real benefits to an organization and all its stakeholders.
