Need to optimize your assets?
Be proactive with ISO 55001.
Get the most from your business with ISO 55001 and BSI.

Our knowledge can transform your organization.

For more than a century we have been challenging complacency to help our clients perform better, reduce risk and achieve sustainable growth.

BSI is renowned for its innovative work in this field, constantly introducing new ways to tackle the challenges presented by the ever-changing threats to business.

You can enjoy the benefits of working with BSI teams who have extensive experience helping businesses embed ISO standards in an array of different sectors. They can help you understand the challenges and share their knowledge.

We provide end-to-end support, helping you monitor and maintain your excellence through our proprietary software and compliance tools so that you can confidently introduce ISO 55001 into your organization.

We talk with, and listen to clients like you every day, asking them what they want and how satisfied they are with our products and services. This way we can make sure we are responding to the needs of our clients as they arise.

BSI invests heavily in recruiting and developing the best assessors, who scored on average 9.2/10 in our Global Client Satisfaction Survey.
Maximize your assets and improve performance with ISO 55001.

If you’re in an organization with multiple assets at the heart of the business, you’ll know that an efficient asset management system should contribute to better operating results and performance and ultimately improve your bottom line.

In response to the ever changing demands on the business world, a new international suite of standards has been created to give guidance in asset management best practice.

ISO 55001 has been developed by the more business-centric than asset-centric, with relevance not only to physical assets but to all other organizational assets such as IT, wherever it lies in an enterprise. With ISO 55001, you will establish a proactive and flexible asset management system that optimizes the value of assets while helping you to meet the necessary performance and safety requirements.

With ISO 55001, BSI offers both certification and verification to help you demonstrate that your asset management system has been independently assessed and that it meets the best practice structure outlined within the standard.

Revenue is anticipated and demonstrated consistently and transparency in your reporting helps you gain greater credibility as a result of a trusted third party verification.

The implementation of asset management in your organization or in other forms of asset at the lowest possible cost of ownership. Certification provides evidence that the investment and expenditure on assets meets with the stated objective and is in accordance with an international business strategy.

BSI will carry out a system and document effectiveness assessment and use evidence of compliance to safety critical systems and procedures. As well as offering certification, BSI is also offering a unique verification service. Assistance can verify your data as a result of your asset management system. This could include the number of assets utilized, performance and replacement value of assets, dispositions costs and revenues.

With PAS 55 becoming ISO 55001 in January 2014, BSI offers both certification and verification to help you demonstrate that your asset management system has been independently assessed and that it meets the best practice structure outlined within the standard.
Increase the life of your assets. Our ISO 55001 solutions ensure their optimization.

As experts in this field we can help you implement, maintain and improve an asset management system.

We can help you choose the right way to get started on the journey towards certification and help you embed your systems with our range of cost-effective services which include training, proprietary software and compliance tools. We can also help with verifying key performance data from running the system as a unique service in addition to your ISO 55001 certification or as a standalone service.
