The changing face of ISO 9001

Public UK Committee Meeting & Forum

Thursday 5 June 2014, Birmingham

Venue: Birmingham City University, Faculty of Technology, Curzon Street, Birmingham, B4 7XG

ISO standards are reviewed every five years to ensure they are still current and relevant in the marketplace. That's why ISO 9001 is currently under review and an updated version is due to publish at the end of 2015.

To broaden stakeholder engagement with the UK committee and input to the ISO 9001 revision, we invite you to attend this one day event so you can learn more about the changes taking place.

Be amongst the first to discover what the latest version of ISO 9001 will look like.

Bringing together a panel of experts, you'll have the opportunity to learn about the public consultation process and comment on the draft international standard.

The event is designed to:

- Broaden stakeholder understanding and involvement in standards development
- Encourage new organizations and bodies to join the UK committee responsible for ISO 9001
- Share the latest news and updates on the ISO 9001 revision
- Address frequently asked questions about key changes
- Emphasize how the revision makes the standard more relevant and easier to use by service industries and SMEs.

To register for this free event, please visit:
