3.3. Time bound plan Finding:

PT Inti Indosawit Subur demonstrates a challenging time bound plan to certify its entire mill and supply bases. Most of the palm oil mills been brought forward and audited in 2014. Audit team sees this as a strong commitment from PT Inti Indosawit Subur.

There are a number of changes noted, where KKPA Penarikan and KKPA Gunung Sahilan moved to 2016, from initial plan to be certified in 2014. PT IIS management is able to provide clear justification. PT IIS management reason was to put resources to certify company-owned estate, then only to certify the smallholders. Audit team

suggest the management justification for the changes is sufficient, considering the management commitment towards RSP0 certification for the entire entities.

Audit team consider the time bound plan is challenging and still relevant to their management. BSI Audit team found that the company comply with the time bound plan.

BSI is in communication with other CB performing certification for PT Inti Indosawit Subur, to understand the partial certification status. BSI assessed PT Inti Indosawit Subur against partial certification requirement and concluded that there is no unresolved significant land disputes, no replacement of primary forest or loss of HCV, no labour disputes that are not being resolved through an agreed process and no evidence of noncompliance with law noted.

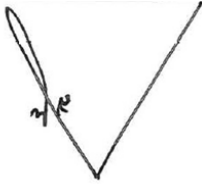

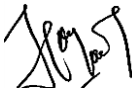

BSI also assessed the requirement for partial certification and concluded that:

1. There are no unresolved significant land disputes.
2. No replacement of primary forest or loss of HCV. New land acquisition follows the RSP0 NPP process including public notification of new planting.
3. No labour disputes that are not being resolved through an agreed process.
4. No evidence of noncompliance with law noted.

RSPO SCCS, NOV. 2014 – MODULE E (MASS BALANCE)**

Criterion E.1. Definition			
	Requirement	Evidence	Compliance
1.1	Certification for CPO mills is necessary to verify the volumes of certified and uncertified FFB entering the mill and volume sales of RSPO certified producers. A mill may be taking delivery of FFB from uncertified growers, in addition to those from its own certified land base. In that scenario, the mill can claim only the volume of oil palm products produced from processing of the certified FFB as MB	<p>The company has established procedure for receiving FFB certified and non certified sources in Procedure No. AA-MPM-OP-1400.18-R3 "Mass Balance, dated 28th October 2013 and procedure No.AA-MPM-OP-1400.17-R3 "Traceability", dated 28th October 2013.</p> <p>The FFB certified source from their own estates (Muara Bulian estate) and 10 scheme smallholders and non certified sources from out-growers.</p> <p>Based on document review, all certified volume of palm oil product (CPO and PK) is claimed as "Mass Balance".</p>	Yes

Criterion E.2. Explanation

The actual tonnage produced should then be recorded in each subsequent annual surveillance report	<p>The estimated CPO and PK certified of Muara Bulian Palm Oil Mill its recorded in RSPO Public Summary report, certificate and E-trace system.</p> <p>CPO and PK estimated in previous Summary Report is 42,495 tonnes and 10,881 tonnes and estimated this year as mentioned in RSPO Public Summary Report "Appendix A".</p>	Yes
