Implementing to ISO 31000

Risk Management

Course Description

If you manage your risk then you manage your success. Find out how protecting your business on a daily basis brings big benefits. Implementing ISO 31000 Risk to Management Systems training course will give management representatives and people responsible for management systems the tools and techniques that will enable the effective application of risk methods to their systems. BSI's Implementing ISO 31000 course provides participants the understanding of risk management concepts with practical tools and methods of implementing risk management. This implementation course is based on industry best practice of risk management as elaborated in ISO 31000: 2009 .

Learning objectives

Upon completion of this training, participants will be able to:

- Articulate the principles of risk management outlined in ISO 31000:2009
- Interpret and describe the framework of risk management based on the 11 principles
- Implement a risk management system
- Understand the mechanism to conduct risk identification, risk analysis, risk evaluation and risk treatment

Who should attend?

- Anyone interested in the implementation of ISO 31000:2009
- Participants involved in developing, operating, and/or maintaining risk management
- Professionals interested or involved with introducing risk management within an organisation
