

BSI's Supply Chain Verification Service

Do You REALLY Know Who Your Suppliers Are?
Look to BSI's Supply Chain Verification Service (VerifEye) and Find Out.

Protecting your company's brand requires strong supply chain risk management as any significant disruption has the potential to ripple through a supply chain and affect its interconnected network. Supply chain transparency enables an organization to identify, manage, and respond to potential risks — and with that increased visibility, establish a more robust supplier program.

Our Services

BSI brings the power of its global footprint and expertise with BSI's Supply Chain Verification Service (VerifEye) to deliver assurance in the suppliers that you depend upon for your products and services.

Don't put your company at risk. We understand supplier verification is the cornerstone of good supply chain practices — and that suppliers are who they say they are and do what they are supposed to do.

Our services encompass auditing threat and risk assessment of supply chain security and delivering customized supplier verification audits to ensure that business continuity, corporate social responsibility, and sustainable business practices as well as any other policies an organization seeks, are adhered to.

Our Audits

- C-TPAT & Supply Chain Security
- Corporate Social Responsibility
- Environmental
- Quality
- Code of Conduct

We do this by going on-site to the supplier location and conducting:

- Factory Tours
- Employee Interviews
- Documentation Reviews
- Supply Chain Reviews
- Supplier Risk Profiles

Our Auditors

Our auditors are deployed in every major country in the world, which brings many advantages:

- Greatly reduced travel costs to conduct supplier visits
- In-depth eyewitness inspections of supply chain facilities and operations
- Capacity to speak local languages means nothing is "lost in translation"
- Deep understanding of local cultures, customs and ways of doing business

- Ability to conduct initial visits quickly — and follow up rapidly when needed
- Able to scale up quickly to meet your network reach and timetable
- Able to apply your company's own standards, practices, and verification criteria

Each of these supplier auditors is trained, screened, and managed by BSI Supply Chain Solutions, which offers you the following advantages:

- Unbiased third-party supply chain expertise
- Consistent supply chain standards, practices, and verification checklists
- Assessment of supplier risk profile to empower your organization to make effective decisions
- Ability to integrate reporting directly into BSI's web-based Supplier Compliance Manager for ongoing supplier tracking and management

BSI's Supply Chain Verification Service (VerifEye) and Supplier Compliance Manager® (SCM)

Your supplier verification reports can be delivered to you through SCM, our web-based tool designed to facilitate and automate supplier risk assessments. This is the same tool used by organizations to manage government compliance programs such as C-TPAT, PIP, and AEO. Not only does SCM make it easy to track your audits it also makes it easier for you to track any corrective and preventive actions for your suppliers.

In addition SCM is coupled with Supply Chain Risk Exposure Evaluation Network (SCREENSM), BSI's proprietary anti-Western terrorism and cargo disruption data which is the industry's leading risk-based assessment methodology for global supply chain management.

For global supply chain managers looking to maximize the visibility and accountability of their supplier partners and minimize their company's exposure and risk in the process, look to VerifEye from BSI.

BSI's Supply Chain Verification Service (VerifEye) compliments your supplier management program, augmenting your resources by:

- Offering global in-country specialists ready to fill in gaps in your existing network
- Conducting on-site audits more cost-effectively using your reporting template or ours
- Responding quickly when surprise or spot audits are needed
- Driving higher supplier accountability through expanded global presence

Benefits

What keeps global supply chain executives up at night? The hidden supplier exposures you don't know. The things you can't possibly prepare for. The surprise phone call.

When you make BSI's Supply Chain Verification Service (VerifEye) a part of your global supply chain visibility program, you'll be putting into motion a global network of objective supply chain experts ready to scrutinize your suppliers through our comprehensive verification process.

We'll come back with a detailed report that highlights any areas of non-compliance or under-performance so that you can mitigate that risk.

Not only will VerifEye by BSI reduce exposure and give you that critical peace of mind you need, but you'll also:

- Demonstrate and enhance your company's compliance with C-TPAT, PIP and AEO and other supply chain standards you've invested so much to secure.
- Establish a deeper supply chain transparency than you ever had before.
- Reduce your supplier verification costs
- Have an agile verification network at the ready, able to respond quickly as needed when issues arise
- Ensure your business continuity and protect your corporate reputation

Infuse your assessments with BSI's proprietary Risk Analysis:

- Supply Chain Security
- Corporate Social Responsibility Risks
- Cargo Disruptions
- Business Continuity Management Exposure

Why BSI

Our History – We don't just apply best practices, we invent them

- Over 100 year history developing global and industry specific compliance standards
- Benchmarking excellence, assessing performance and transferring knowledge

Our Approach – One size does not fit all

- We take everything we have learned and come up with a solution, tailored specifically for your company, designed to meet your needs.

Our Customers – Partners in Excellence

- BSI enjoys a deep history across a variety of industries
- More than 65,000 customers globally
- Companies and thousands of small to medium sized organizations that support the industry.

Our People – BSI's breadth of knowledge spans across multiple areas of your organization

BSI is a leading global provider of risk-based solutions, assessments, and training programs geared toward improving corporate efficiencies and protecting corporate brands.

Our solutions incorporate BSI's proprietary global cargo tampering data and terrorism risk modeling to evaluate overall supply chain risk as well as the potential risk exposure of specific suppliers.

The combination of our tools and BSI's field-based global network of supply chain security assessment professionals provides our clients with expert visibility into supplier practices worldwide.
