EU General Data Protection Regulation (GDPR)

Achieving compliance
The new EU General Data Protection Regulation (GDPR) will apply across all EU member states, with the official date for enforcement set for 25 May 2018. This reform has significant implications for business, not only for those based in the EU, but for all organizations operating within the EU market.

The new EU reform regulation aims to:

- **Reinforce** the rights of the individual — privacy by design and by default
- **Strengthen** the EU internal market through new, clear, and robust rules for the free movement of data
- **Ensure** consistent enforcement of these rules
- **Set** global data protection standards
- **Safeguard** a golden standard for data protection across all industries
The new EU General Data Protection Regulation (GDPR) will apply across all EU member states, with the official date for enforcement set for 25 May 2018. This reform has significant implications for business, not only for those based in the EU, but for all organizations operating within the EU market.

The new EU reform regulation aims to:

• Reinforce the rights of the individual – privacy by design and by default
• Strengthen the EU internal market through new, clear, and robust rules for the free movement of data
• Ensure consistent enforcement of these rules
• Set global data protection standards
• Safeguard a golden standard for data protection across all industries

GDPR – enhancing data protection and privacy

Achieving EU GDPR compliance

We have a range of services that can help you work towards GDPR compliance and continue to improve over time.

1. Understanding

   1. Board and executive level awareness workshops
   2. Data asset workflow and mapping
   3. Gap analysis
   4. Legal and regulatory requirements assessments
   5. Data protection risk assessments
   6. Training and awareness for staff

2. Implementation

   1. Outsourced Data Protection Officer (DPO) services
   2. Privacy compliance framework development
   3. Data protection and privacy implementation support
   4. Privacy by design support - privacy impact assessments
   5. Support services to implement, operate, and improve "safe and secure principles" such as:
      - Penetration testing
      - Encryption usage review
      - Incident management and breach support
      - Security controls
      - Subject access requests including eDiscovery services

3. Improvement

   1. Data Protection partner programme service for ad hoc assistance
   2. Compliance expertise reviews
   3. Compliance and assurance assessments
      - Privacy compliance audits
      - Internal audits
      - Independent third party audits
      - Preparation for supervisory authority audits
      - Attendance during supervisory authority audits
      - External audits for data transfers outside EU
      - Certifications – e.g. PCI-DSS

Did you know? BSI now have a standard (BS 10012) helping organizations demonstrate effective management of personal information, covering GDPR requirements. For more information visit bsigroup.com

No matter where you are in meeting GDPR requirements, we can enable you achieve compliance at each stage of the journey.
Data protection training courses

We provide a range of training courses in privacy and data protection. They focus on giving you the knowledge and skills to confidently build and manage data protection and privacy for your organization.

Certified EU General Data Protection Regulation (GDPR) foundation
One day course

In this one day course, our expert tutor will explain the requirements of the General Data Protection Regulation (GDPR), to help you understand how it could apply to your organization and the benefits of adopting it.

This is a foundation, non-technical course for both technical and general management interested in learning about GDPR and compliance around the new regulation

How does EU GDPR foundation course help:
You will gain knowledge on how to adhere to the new regulation and kick-start compliance with a variety of activities, such as personal data scoping exercise and gap analysis, a privacy impact and risk assessment, or a full data protection audit.

Certified Information Privacy Manager (CIPM)
Two day course

The CIPM certification is the "how-to" in privacy operations. A CIPM is able to structure an organizations’ privacy team effectively. It equips you with the ability to develop, implement, and measure a privacy program framework while utilizing the privacy operational lifecycle: access, protect, sustain, and respond.

How does CIPM help with GDPR requirements:
A CIPP/E combined with a CIPM means that you are uniquely equipped to fulfill the requirements of a Data Protection Officer.

Certified Information Privacy Professional/Europe (CIPP/E)
Two day course

The CIPP/E covers the fundamental pan European and national data protection laws. It is the most recognized credential of its kind in the data protection and privacy field.

The course examines industry best practices in privacy compliance concepts of data protection and trans-border data flows. The CIPP/E covers critical topics like the EU-U.S. Privacy Shield and the GDPR.

How does CIPP/E help with GDPR requirements:
Achieving the CIPP/E demonstrates you have the comprehensive GDPR knowledge and understanding to ensure compliance and data protection success.

Certified Information Privacy Technologist (CIPT)
Two day course

CIPT certifies delegates in the knowledge of privacy and data protection related issues, in the context of design and implementation of information and communication technologies. It looks at the privacy considerations for IT systems and applications. It examines industry standard guidelines for the collection, use, retention, and destruction of data.

CIPT provides a solid foundational level in data protection and privacy laws, concepts and regulations, while giving delegates the knowledge to create the information privacy infrastructure.

How does CIPT help with GDPR requirements:
CIPT will enable you to build your organization’s privacy and data protection infrastructure, ensuring 'privacy by design' a key GDPR value.

Cybersecurity and Information Resilience services

Our Cybersecurity and Information Resilience services enable organizations to secure information from cyber-threats, strengthening their information governance and in turn assuring resilience, mitigating risk whilst safeguarding them against vulnerabilities in their critical infrastructure.

We can help organizations solve their information challenges through a combination of:

**Consulting**
Cybersecurity and information resilience strategy, security testing, and specialist support

**Research**
Commercial research and horizon scanning projects

**Training**
Specialist training to support personal development

**Technical solutions**
Managed cloud solutions to support your organization

Our expertise is supported by:
