

Organizations that don't incorporate geographic risk into their procurement and supply chain management strategies leave their supply chain vulnerable and exposed. Not understanding where the threats lie throughout your global operations increase the chances of experiencing a disruption that could drastically affect your flow of goods and brand. In order to protect your organization, it's important to have complete visibility into country level threats and trends. Supply Chain Risk Exposure Evaluation Network (SCREEN), is BSI's web-based, comprehensive global supply chain intelligence system. SCREEN is the most complete, publically available Supply Chain Security, Corporate Social Responsibility, and Business Continuity intelligence and analysis resource used to measure country level risk factors through BSI's 25 proprietary country level supply chain risk ratings.

SCREEN's unique, proprietary global supply chain risk data and analysis helps you identify and understand where your supply chain risks exist. SCREEN generates real-time trade interruption updates, BSI-authored special reports on major disruption incidents and trends, countermeasure programs, and risk mitigation best practices in order to help your organization protect your supply chain. Our intelligence provides corporations with full transparency of country risks and helps them to make intelligent risk-based decisions when sourcing materials and selecting suppliers. SCREEN's intelligence is an essential resource to utilize when developing a risk management program to identify security, corporate social responsibility and business continuity risks.

## KEY FEATURES

### Robust Intelligence Modules

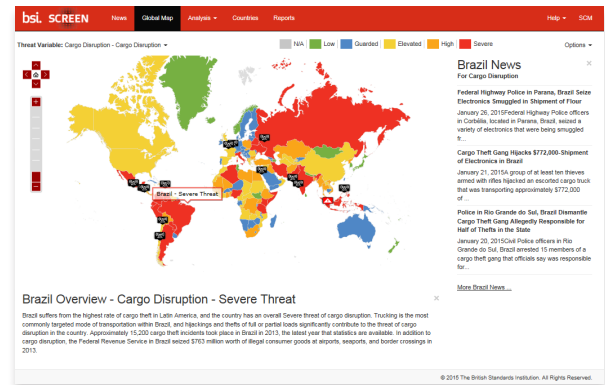

SCREEN provides corporations with the ability to purchase specific intelligence modules in the areas of Supply Chain Security, Business Continuity, Corporate Social Responsibility and Food. These separate modules allow users to select the intelligence that best fits their risk needs. All modules include spotlight news, BSI's unique country threat ratings, robust supply chain risk data and analysis, interactive risk maps, qualitative reports and more.

Supply Chain Security	Corporate Social Responsibility	Business Continuity	Food
<ul style="list-style-type: none"> <li>Cargo Disruption</li> <li>Cargo Theft</li> <li>Hijacking Exposure</li> <li>Unmanifested Cargo</li> <li>Counterfeiting</li> <li>Sea Piracy</li> <li>Corruption</li> <li>Supply Chain &amp; Anti-Western Terrorism</li> </ul>	<ul style="list-style-type: none"> <li>Human Rights</li> <li>Environmental</li> <li>Child Labor</li> <li>Women's Rights</li> <li>Working Conditions</li> <li>Forced Labor</li> </ul>	<ul style="list-style-type: none"> <li>Natural Disasters</li> <li>Natural Disaster Resiliency</li> <li>Man-Made Disruption</li> <li>Political Stability</li> <li>Economic and Financial Stability</li> </ul>	<ul style="list-style-type: none"> <li>Food Safety</li> <li>Food Fraud</li> </ul>

### Interactive Risk Mapping

Each proprietary risk indicator is conveniently displayed for over 200 countries through SCREEN's global risk mapping views. For every indicator, a country is assigned a rating of Low, Guarded, Elevated, High, or Severe. This rating system allows users to quickly identify and categorize the threats to their supply chain and address them quickly. When in the mapping view, users can select an individual country and view related spotlight news updates, demographics, risk data and analysis and country threat ratings.

BSI's enhanced risk mapping feature also displays SCREEN alerts in the associated country to quickly notify users global threats, is used as the standard benchmark for many national government and corporate programs to quickly determine appropriate policies and procedures to implement for proper supply chain operations.

## Spotlight News

SCREEN's Spotlight News provides data and analysis on the most pressing global incidents on a daily basis. Each update encompasses a general summary of the incident and BSI's own analysis of the incident. The analysis provides the risk rating of the associated country and the explanation of the rating to help you better understand the country level threats and trends. The Spotlight News feed can also be filtered to provide you with a more focused view of your specific risk concerns.

All of SCREEN's incident updates, reports, countermeasures and shared best practices are tagged with subject area identifiers. This allows users to search keywords to easily identify relevant information around specific subject areas throughout the entire SCREEN system.

## Automated Notifications

Staying informed and in front of potentially damaging incidents is made easier through SCREEN's automated incident notifications. SCREEN provides users the ability to stay current and up to date with breaking news and changing conditions around the world that impact the integrity of their supply chain. Users are able to subscribe to the notifications for specific locations and subject areas that concern them the most. Based on the selections, emails are automatically generated and sent to users directly from BSI's intelligence center containing new incident or country analysis, or special report updates.

## Custom Country Report Builder

SCREEN's country reports provide users with a complete picture of threats to the supply chain in over 200 countries. BSI's reports include exclusive, proprietary information written by BSI's Intelligence Team detailing incidents and regulatory updates that may affect global supply chain operations. These reports are generated through careful analysis and exclusive information compiled by BSI's global team of intelligence analysts and supply chain experts. SCREEN's custom country report builder provides users with more control over the areas that are represented in the report. Users can easily pull and compare reports for multiple countries, threat assessments and commodities tagged throughout the SCREEN system instantly.
