

AS/EN/JISQ 9120 (Rev:B) 9120 Additional Requirements to 9001

Training course

STAGE: 

Essential information about the course

The aerospace quality management standard, AS/EN/JISQ 9120, has been developed specifically for aerospace distribution and stockist organizations.

In today's fast-paced environment, customers are more demanding, and competition is more intense. Effective implementation of a quality management system, based on AS/EN/JISQ 9120, can help organizations to ensure safety, reliability and airworthiness.

Having an internationally recognized aerospace quality management system (AQMS) allows you to enhance organizational performance, increase customer satisfaction and gain a competitive edge.

This course will enable you to identify the requirements and the structure of an effective AQMS and what this means for you. You'll gain a thorough understanding of the history and development of AS/EN/JISQ 9120 (Rev:B), key terms, definitions and requirements. You'll learn to interpret and apply the key concepts and principles of the standard to existing processes within your organization.

Our course agenda:

Day 1:

- Importance and benefits of a 9120 AQMS
- History of 9120, the role of IAQG and the standards that support the programme
- Relationship between 9120, ISO 9001:2015 and the Annex SL framework
- Terms and definitions of 9120
- Key concepts of 9120
 - Quality management Principles
 - Risk-based thinking
 - Process approach
 - Process effectiveness
 - Plan-Do-Check-Act (PDCA)
- Requirements of 9120
 - Introduction
 - Clause 4: Context of the organization
 - Clause 5: Leadership
 - Clause 6: Planning for the QMS
 - Clause 7: Support
 - Clause 8: Operation
 - Clause 9: Performance evaluation
 - Clause 10: Improvement

Upon successful completion of your course, you'll receive an internationally recognized BSI certificate.
