

BSI Training Academy

BIM Fundamentals training course

Essential information about the course

Level 

BIM training can help support your strategic direction, prove competency, and embed the knowledge of BIM in your organization. If you require a detailed understanding of the key drivers, requirements and strategic alignment needed to deliver BIM and how it allows you to achieve a faster, more efficient delivery of projects this is the course for you.

This course will also help you understand BIM Level 2 from the perspective of clients, customers, designers,

constructors and your supply chain, reflecting on the impact of BIM Level 2 for your organization and what next steps need to be taken.

The two-day course will give you the knowledge and skills required to effectively implement BIM across your organization and supply chain. You will discover the barriers to adoption and how to overcome these as well as the benefits of structured collaboration and how it enables growth.

Our course agenda

- Benefits to you, welcome and introductions
- Background and concept
 - Industrial support
 - Global context
- Standards
- Common concepts for how BIM is implemented
 - BIM and collaborative working
