13:35 - 14:35 Discussion Panel: Future trends in Privacy Enhancing Technologies (PET)

Privacy Enhancing Technologies (PETs) are not unknown to the majority, but some are still evolving and organizations looking them to more than ever, in addition to bringing opportunities they pose challenges of their own. PETs can be used in many different settings, from financial transactions, data transfers through to healthcare sector like COVID-19 contact tracing.

This panel will consider how can PETs, Data Protection and Privacy work together to improve business process/performance and create a safer virtual environment as well as the challenges that come with them.

Chair – Paolo Balboni, Founding Partner, ICT Legal Consulting

William Malcolm, Director, Privacy Legal, Google

Mark Thompson, Director of Research and Insight, IAPP
