Continuous Improvements with British Standards Online (BSOL) 2020/21

“BSOL gives easy access to standards we need to use regularly but also enables us to find other standards of interest to us.”

BSOL customer
Enhanced functionality and features improvements to BSOL

**Tracked Changes**

Keeping up with what's relevant and monitor what has changed can be a struggle, which is why we've introduced Tracked Changes documents into BSOL. Tracked Changes is a version of a standard that indicates a change has been made, during the standards revision process, between the active standard and its previous version. Additions, deletions, and other formatting and/or content revisions are clearly displayed as underlined and strike through texts, ensuring all changes made between the two documents are quickly and easily identified.

**Adoption Gap**

To make sure that our customers can comply with and take advantage of the latest standards content, all "pure" ISO and IEC standards will be made available within BSOL for customers who also take international or European standards as an addition to their subscription. This means that any delays between the adoption of standards will not affect BSOL customers. Customers will be able to add the standards to their ISO* or IEC* custom collection while BSI goes through the formal adoption process at which point the "pure" ISO or IEC will be removed and replaced by the British adoption. Of course, any standards that are not adopted by BSI will remain in your collection.

*ISO and IEC custom collections available at an additional subscription cost.

**What our customers say**

"When working on several structures, the use of accessing standards via BSOL allowed for the correct standards to be used – in particular those which were current and not withdrawn. This was praised by the client."

**Password Manager**

Get easy access to BSOL with Password Manager which enables securely saving, remembering and auto-filling your password.
New additions to BSOL

Standards within BSOL cover all organizations from all industries.

- £113,376 Added value to Sciences and Health Care standards
- £21,924 Added value to Agriculture and Agricultural Engineering
- £73,168 Added value to Metal Treatment and Welding
- £25,392 Added value to Electrical Components
- £128,514 Added value to Information Technology - Hardware and Office Machines
- £55,858 Added value to Civil Engineering
- £16,124 Added value to Materials for Aerospace Construction
- £256 Added value to Fluid Systems & Components
- £36,349 Added value to Shipbuilding and Marine Structures

To discuss any of these standards, please contact your Account Manager, visit: bsigngroup.com/bsol or call: +44 (0)20 8996 7029
New additions to BSOL Pre-Built Modules

At BSI we are always looking to add more knowledge to BSOL. Below you will find each of our pre-built modules, the additional volume of standards we’ve added, total documents per module and the increased value of content available:

<table>
<thead>
<tr>

**What our customers say**

“It has been a godsend in ensuring items being sourced during the pandemic meet the proper standards.”
