Need to improve the management of your electronic information?

You can rely on BS 10008

...making excellence a habit™
BS 10008 is the British standard that sets out the requirements for implementing and operating an electronic information management system, and the electronic transfer of information from one computer system to another. It covers any form of electronic information, from scanned and word processed documents through to AV files and CCTV video streams. And it provides the requirements for a secure system to manage electronic information throughout its lifetime.

BS 10008 is a recognized standard that provides reassurance that you are handling and storing electronic information responsibly. It addresses legal admissibility concerns, helping you face any legal situation with the confidence that you have implemented best practice and your electronic information will be accepted by a court of law.

And BS 10008 is appropriate for any organization that is capturing, converting and storing information in an electronic format, whether they are a large corporate or an SME. It is particularly relevant to the medical and legal professions, insurance companies, government departments and financial services organizations.

BS 10008 will provide you with a best practice framework for the implementation and operation of an electronic information management system to ensure the authenticity, integrity and availability of electronic information requiring legal admissibility.

Benefits of a comprehensive electronic information management system include:

- **Management**: Introduce rigour, discipline and traceability into your management of electronic information.
- **Finance**: Increase organizational efficiency with a structured framework for managing electronic information.
- **Sales & Marketing**: Provide reassurance to you and your customers that you are adhering to electronic information management best practice.
- **Legal**: Overcome legal admissibility concerns as to whether or not a piece of evidence would be accepted by a court of law.
- **IT & Operations**: Demonstrate reliability of your storage system, both internally and externally. Ensure the authenticity of your documentation. Manage quality issues related to document scanning processes.
Benefits of a comprehensive electronic information management system include:

- You are handling and storing electronic information responsibly.
- It provides the requirements for a secure system to manage electronic information throughout its lifetime.
- It covers any form of electronic information, from scanned and word processed documents through to AV files and CCTV video streams.
- BS 10008 is the British standard that sets out the requirements for an electronic information management system to ensure the authenticity, integrity and manage its authenticity and integrity over time. It covers any form of electronic information, from scanned and word processed documents through to AV files and CCTV video streams.
- It addresses legal admissibility concerns as to whether or not a piece of evidence would be accepted by a court of law.
- It helps you in implementing a successful framework to ensure the authenticity and integrity of electronic information and manage the associated risks.

Implementing BS 10008 with BSI will help you identify the relevant risks to your electronic information and manage its authenticity and integrity over time. We will work with you at every step of the way to make sure you have confidence in your system and the reassurance you need.
Why BSI? Because we know a good BS 10008 when we see one.

We can help give you a competitive advantage because:

1. BSI is the business standards company that helps organizations make excellence a habit – all over the world. That’s our business, enabling others to perform better.

2. With over 70,000 clients in 150 countries, our clients can trust BSI to help them perform better, reduce risk and grow sustainably.

3. Our clients range from top global brands to small ambitious businesses. Our people have understood their challenges, and see the opportunities to share learnings.

4. Clients enjoy the benefits of working with experienced BSI trainers and assessors. They will ensure your people are competent and fully able to implement systematic risk practices that are tested and work, day in, day out.

5. We talk with, and listen to clients every day, via our ‘Voice of the Customer’ survey. We ask them what they want and how satisfied they are with our products and services, so that we make sure we are meeting their expectations and giving them the opportunity to tell us their thoughts.
Use BS 10008 from BSI to protect your business.

As experts in this field, we have designed a range of products and services to help you identify the risks associated with your electronic information so you can manage them to a best practice framework.

BS 10008 compliments ISO 27001 in that the implementation and monitoring of an information security management system (ISMS) will act as significant evidence in the demonstrating authenticity for your electronic records.

Reducing your risk and protecting your business
