**BSI customer testimonials**

“"A venture into new territory is best supported when delivering a commitment based on reliable access to respected standards.”

“"We’re spread around in two or three key operational centres, so (previously) we’d have to physically visit the catalogue. Online it’s much easier.”

“"It’s just one minute to find it, download it, and it’s there on your desktop... Our engineers can be at a factory in the middle of nowhere and quickly download the latest British Standard.”

“"We have made a significant saving, because before it was practically a full time job to update standards manually... It’s useful and easy to use.”

“"I also find it very useful to be able to find superseded and referenced documents... Some of our internal standards haven’t been updated since the nineties, and otherwise it would be a struggle to bring them up to date.”
