New revised pricing for 2019!

Data protection and data privacy training

Fundamentals of General Data Protection Regulation (GDPR)

A one day foundation, non-technical course for both technical and general management interested in learning about GDPR and compliance around the regulation.

GDPR Implementer / Auditor Self-Assessment

This two day training is aimed at stakeholders within organizations who are accountable for ensuring compliance with the GDPR. This course will position attendees to start a self-assessment exercise of their own organization.

Certified Information Privacy Professional Europe (CIPP|E)*

The course examines industry best practices in privacy compliance concepts of data protection and trans-border data flows. The CIPP/E covers critical topics like the EU-U.S. Privacy Shield and the GDPR.

Certified Information Privacy Manager (CIPM)

The CIPM equips you with the ability to develop, implement, and measure a privacy program framework while utilizing the privacy operational lifecycle: access, protect, sustain, and respond.

Information security training

Certified Information Security Manager (CISM)

This four day training is based on the ISACA framework, which has five domain areas that relate to the role of a CISM.

Certified Information Systems Auditor (CISA)

During this four day course you'll learn about the five domain areas that relate to the role of a CISA based on the ISACA framework.

Incident Response for Managers

This one day theory based course is designed for managers and decision makers who may be involved in the management of a cyber or other form of security incident involving data and / or IT equipment.

EC-Council's Certified Chief Information Security Officer (C|CISO)

The EC-Council's C|CISO program has certified leading information security professionals around the world. The program comprises three components: Training, Body of Knowledge, and the C|CISO exam.

Information security training

Certified Information Systems Security Professional (CISSP)

If you're building a career in information security then CISSP is the must-have qualification to help you progress. This course will prepare you with the knowledge and skills to complete the CISSP exam, which will get you Certified Information Systems Security Professional status.

Security Foundations

This one day theory based course has been designed by security consultants, which aims to provide candidates with an understanding of the principles of security, risk management and the role of cybersecurity professionals within an organization.

EC-Council's Computer Hacking Forensic Investigator (C|HFI)

Get the knowledge and expertise to carry-out a computer forensic investigation with the C|HFI training course.

EC-Council's Certified Network Defender (C|ND)

This is a four day vendor-neutral, hands-on, instructor-led comprehensive network security certification training program. It is a skills-based, lab intensive program based on a job-task analysis and cybersecurity education framework presented by the National Initiative of Cybersecurity Education (NICE).

EC-Council's Certified Ethical Hacker (C|EH)

On this five day course you will learn ethical hacking and network security skills along with a new and exclusive crash course in GDPR Fundamentals module.

EC-Council's Certified Incident Handler (E|CIH)

This three day course is designed to provide the fundamental skills to handle and respond to the computer security incidents in an information system.

Cloud security courses

Certificate of Cloud Security Knowledge (CCSK)

Gain the skills to identify security threats and best practices for securing the cloud. You'll learn how to assess, build, and secure a cloud infrastructure through a series of hands-on practical exercises.

Certified Cloud Security Professional (CCSP)

If you're building a career in cloud security, then the CCSP is the must-have qualification to help you progress. This training course will provide you with the knowledge and skills required for the CCSP exam.

In-company training – structured training, delivered in-house

You can select any course from our extensive range and have it delivered to your team on-site, or even request a bespoke course.

Our expert tutors will take the time to understand your company's learning needs so that we can provide a training solution that satisfies your business objectives.
