Assurance Portal

Assurance Portal is focused on your BSI audits and visits. Key features include:

- BSI assessment dates
- BSI audit visit reports
- BSI audits findings (CAPs)
- Task assignment

Unlocking the potential of your management systems (ISO, Kitemark™) is more than just getting a certificate, it's about embedding it within your organization to make best practice second nature amongst employees at all levels (front line, managers, directors, board). With an engaged staff, a culture of continual improvement, good processes and a robust infrastructure; you are in the best place possible to improve your company performance and make it as **resilient** as possible.

Entropy is our web-based software platform that helps to manage, control, maintain and improve your most important business operations (policies and procedures, training records, meetings, accident reporting, customer feedback, risk assessments and more). **Read what our clients think of it**.

Features and benefits of Entropy include:

- Single system approach rather than lots of disparate ones
- "Single truth" of the data in real-time
- Increased visibility and sharing of information for all staff
- Consistency of approach across sites and business units
- Timely processes and actions with automated reminders
- Master calendar of all your key activities
- Proactive trend analysis through reports and dashboards

Entropy and BSI Assurance Portal combine seamlessly to provide a single view of your organization. Entropy is a window into your own internal world, whereas the Assurance Portal is a window into your BSI world. A set of powerful business insight tools.

To find out how **Entropy** can help you improve your management systems or to request a demo please contact a member of our team on **0345 080 9000** or email us at **info.entropy@bsigroup.com**
