

# Looking to make the world a better place?

## Begin your standards adventure with BSI

Every year BSI and its partners offer young engineers the chance to take part in the IEC Young Professionals Programme, all-expenses paid.

The Programme brings together the world's upcoming expert engineers, technicians and managers and provides them with opportunities to shape the future of international standardization and conformity assessment in the field of electrotechnology.

The IEC is the world's leading organization that prepares and publishes international standards for all electrical, electronic and related technologies.

Every year its standardization and conformity assessment work leads to a week-long meeting – the IEC General Meeting – at which stakeholders from around the world debate current issues and decide on IEC's future direction and strategy. The IEC Young Professionals Programme takes place during this week.

The next IEC Young Professional Programme takes place in Shanghai, China in October 2019.

### Who should apply?

This professional development opportunity is open to engineers aged 35 or under as of 30 June in the year of the event for which they're applying.

We welcome applications from ambitious engineering professionals who are currently making, or wishing to make, a difference in their industry, and with an interest in the standards they encounter in their professional practice.

### Why apply?

- Represent the UK at a prestigious international event and enhance your professional reputation
- Get your voice heard in the international arena and help shape the future of international standardization
- Network with other upcoming expert engineers, technicians and managers
- Help cultivate a positive environment for the involvement of early-career professionals in international standardization

### Apply now!

The deadline for applications is 31 May 2019.

Visit our website to find out more about the programme and to download an application form.
