

PAS 2080 – Carbon Management in Infrastructure Verification

Client guide to assessment

bsi.

...making excellence a habit.™

Demonstrate your commitment to carbon reduction through PAS 2080

PAS 2080 provides a common framework within the infrastructure sector and supply chain that helps companies reduce the volume of carbon used throughout a project. It encourages organizations to work collaboratively and more effectively by managing the whole life cycle of carbon use, encouraging them to create a more sustainable way of working.

The benefits include:

Reduced costs – PAS 2080 verification promotes collaborative working. This helps you align processes and offer enhanced service solutions through your supply chain – plus, reducing carbon, reduces cost.

Innovate – PAS 2080 encourages innovation by asking adopters to ensure that they are challenging, promoting and innovating lower carbon solutions.

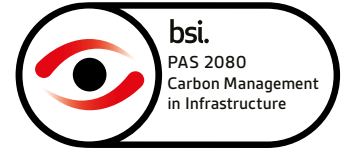

Win Tenders – demonstrating compliance to PAS 2080 not only separates you from competitors but clearly establishes your commitment to carbon reduction and cost efficiency.

Tackle climate change – the impact of infrastructure in the UK accounts for approximately 50% of the UK carbon footprint. Play your part in meeting the government carbon reduction targets by obtaining PAS 2080.

How to achieve PAS 2080 verification for Carbon Reduction

1 Understand and prepare – download the PAS and read it; understand the content, your requirements and how it will improve your business.

2 See how ready you are – ensure your organization understands the principles of PAS 2080 and the roles individuals will need to play, and review your activities and processes against the standard.

To help gain practical advice on how to implement the requirements, download the 'Guidance Document for PAS 2080' available online, to help you start your journey

3 Review and get verified – book your assessment with one of our expert Client Managers for your on-site audit where we'll assess your systems against PAS 2080. The duration of assessment will depend on the size and complexity of your business.

Your journey doesn't stop with verification

We can help you to fine-tune your organization so it performs at its best

- **Celebrate and promote your success** – download and use the BSI Assurance Mark to show you are verified
- **BSI Business Improvement Software** will help you to manage systems and drive performance
- **Consider integrating other management system standards** – such as ISO 44001 Collaborative Working, to help maximize supply chain relationships

Why BSI?

SKANSKA

"PAS 2080 provides a common framework and guidance for the whole value chain to tackle the carbon challenge. It is essential for clients, designers, contractors and suppliers to work together if we are going to drive to drive a low carbon future."

Adam Crossley, Director of Environment

bsi.

"Creating a sustainable way of working in infrastructure is critical to the future of industry. PAS 2080 is the clear choice for those considering reducing their carbon footprint and improving the effectiveness of their business."

Natasha Bambridge, UK Product Certification Director
