bsi **Your partner in progress**

BSI: Your testing and certification partner for excellence

Testing and certification for fire detection, suppression and system installation

Contents

Introduction

At BSI we have a full range of testing and certification services to enable you to bring your products to market effectively. We're independent of all product suppliers, installers and manufacturers, so we can guarantee a confidential and impartial service, and provide you with reliable objective guidance.

Use BSI to help you independently demonstrate compliance of your new and innovative products or services. We can support your CE and UKCA declaration, provide third party certification such as BAFE or BSI Kitemark™ as your passport to new markets and opportunities
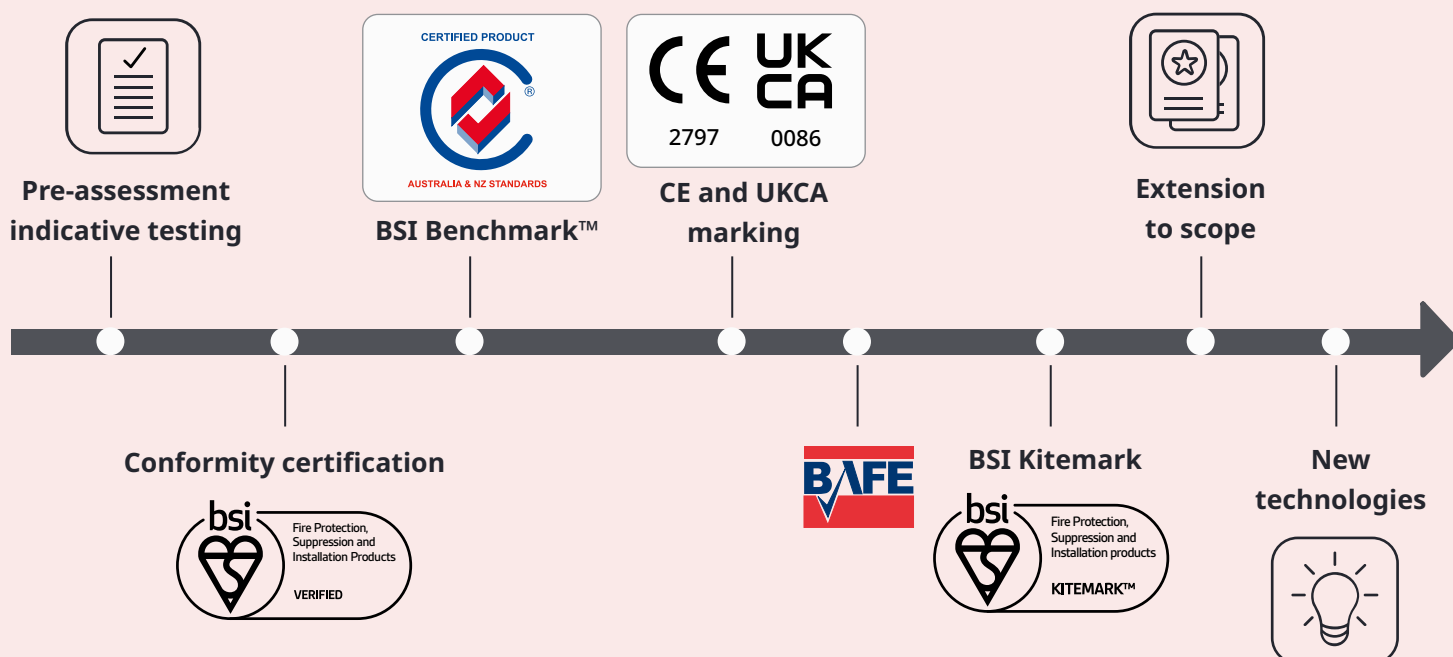

We've been testing fire products since 1960. **As a UKAS and RVA accredited organization**, we have the expertise and integrity to independently endorse your product development, your credentials and your brand. Plus with our Notified (CE) and Approved (UKCA) Body status for specific Directives and Regulations, we're committed to helping you meet and demonstrate compliance to the relevant standards and legislation. We focus on delivering a testing and certification partnership

underpinned by quality, safety, reliability and accuracy aligned to your product development requirements.

Where are you on your journey?

We have a full suite of testing services for you to choose from, to help you get your products to market. Plus if you're developing new products, talking to our experts early in the development process can help you realise the full potential and commercial advantage of certification, with significant efficiencies and increased profits to be gained for your business. And with our global reach – with partner laboratories in the UK, Europe, USA, Hong Kong and China, we can support your business locally.

Your roadmap to certification with BSI

Pre-assessment indicative testing

BSI Benchmark™

CE and UKCA marking

Extension to scope

Conformity certification

BSI Kitemark

New technologies

Our services include:

Pre-assessment/indicative testing

We can help support your product development process to test your innovation as a more cost effective solution before you apply for third-party certification. Any non-conformities can be identified at an early stage, reducing the need for re-testing during a formal compliance test.

Your commercial advantage:

Get your products to market more quickly. Investment at this stage could help you steal a march on your competitors.

Conformity certification

If you've self-declared your products in order to meet specific standards, you'll have your own test data, technical files and test reports. If no standard exists in the marketplace, you may have your own test data or evidence that your product has been assessed to a certain requirement. If you're looking for additional verification of your claims of conformity, we can help. We can review all of your technical information, carry out further tests if appropriate and issue a Conformity certificate to you.

Your commercial advantage:

Self-declaration supported by BSI Conformity certification can offer your customers increased levels of confidence in your products. We'll give you the independent overview in specific technical areas, and you'll be able to use Conformity certification to support procurement specifications.

BSI Benchmark™ - enter the AU/NZ international markets

BSI Benchmark is a registered certification mark that is highly recognized and respected as a symbol of quality and safety. A product bearing this mark indicates that BSI has conducted a rigorous audits of its manufacture and production, and symbolizes that the product complies with the appropriate Australian, New Zealand and/or International Standards.

BSI assigns a client care specialist to help you with the pre-audit information exchange and scheduling an appropriate audit date. Our technical experts assist with testing and developing the audit scope. Qualified auditors complete the initial and annual assessments at your manufacturing plans and provide a prompt report of your status against the accreditation scheme.

Your commercial advantage:

The BSI Benchmark is a powerful marketing tool which works around the world as a global passport to help you gain access to new markets.

CE and UKCA marking

To export your products to Great Britain (England, Wales, Scotland) or Northern Ireland, you may need to achieve UKCA or CE Marking. Many products require certification from an Approved/ Notified Body in order to receive a declaration of conformity and the right to use the UKCA and/ or CE mark. CE marking is a legal requirement for certain products to be sold in the EEA (European Economic Area). Products requiring independent certification for UKCA/ CE marking include certain fire suppression, detection and extinguisher products, certain electronics, home appliances, personal protective equipment such as helmets, respiratory devices and safety eyewear and some construction products.

BSI is a UKCA Approved Body (0086) and CE Notified Body (2797) and can provide both UKCA and CE certification. We have the expertise to help you understand what your responsibilities are and can provide the third-party evidence you need to be able to affix a UKCA or CE mark to your compliant products.

Your commercial advantage:

If the Great British, Northern Irish or EU market is your destination, UKCA and CE marking is your market access route to new opportunities and increased sales in these markets.

BSI Kitemark™

BSI Kitemark has been in existence since 1903. We're proud to own it. It's unique to BSI and has helped to address safety, quality and security issues for thousands of products.

Rigorous testing to national or international standards, on-going sample testing to avoid any slippage of manufacturing quality or product performance, and annual assessments of factory production controls all combine to give truly robust, independent, voluntary third-party certification with the BSI Kitemark.

If you choose to implement ISO 9001, the international management system for quality to help control your factory production, we can offer you certification against this management system too.

Your commercial advantage:

The BSI Kitemark is a powerful marketing tool which works around the world as a global passport to help you gain access to new mar.kets.

75%
of clients say BSI Kitemark helps them attract new customers.

65%
confirm the BSI Kitemark helps to increase sales.

Plus you can offer your customers additional peace of mind. Direct future clients to your full range of BSI Kitemark approved products, listed in our online Kitemark directory to give additional reassurance.

Extending the scope of your certificates

If something has changed which needs to be reflected on your certificate, we can help. From a new location to a new product or modification, we can help you make sure your products still comply, and your certificate is still valid.

New technologies

Where new or adapted products are ahead of the curve, a relevant standard may not yet be available. We can still help. We can often use other specifications or technical documents, such as trade association specifications or what are known as publically available specifications (PAS's). As long as they're robust, developed by consensus and publically available, we can run a valid certification scheme to them. We're also, where appropriate, able to combine clauses from specific standards in order to be able to offer third-party certification.

Your commercial advantage:

You could be first to market, gaining a significant competitive edge. Combining this with the BSI Kitemark could significantly boost confidence in your products.

Our facilities

We offer a comprehensive range of testing and certification for over 90 different standards for BSI Kitemark, CE, UKCA marking and BAFE, including on-site witness testing and integrated multi-assessments.

At our Centre of Excellence, we have facilities to undertake a wide range of testing on fire suppression equipment at our Hemel Hempstead Laboratories, and we also have off-site facilities for fire testing. Our labs are equipped with a comprehensive range of tools for testing fire detection panels, power supplies, various types of detectors, call points, sounders, visual alarm devices, and line units. Additionally, our Loughborough testing site has the capacity to test fire products. Our engineers can visit manufacturers' premises or other independent laboratories to undertake work where this is convenient and suitable.

Clients are welcome to view the testing of their products, meet our technical engineers, and experience testing first-hand to share with colleagues and technical teams. Plus, if you wish to

film the testing of your products for promotional or technical purposes, we're happy for you to choose this option*.

Our fire testing portfolio

Fire suppression

Fire brigade equipment

Fire hoses
- BSI Kitemark

Fire hydrants, landing valves, breeching inlets
- CE marking for underground and pillar fire hydrants
- BSI Kitemark

Hand applied units
- BSI Kitemark

Fire hose reels

- Construction Products Regulation
- BSI Kitemark

Fire hose connectors

- BSI Kitemark

Fire extinguishers

We offer a complete testing package including on-site witness testing and integrated multi-assessment visits.

- CE marking for the following Directives: Pressure Equipment Directive (PED) Marine Equipment Directive (MED)
- BSI Kitemark for major British and European standards covering specific characteristics, fire performance, test methods, assembly, construction and pressure resistance. Covering portable and mobile fire extinguishers, aerosol fire extinguishers and liquid fire-extinguishing media.

Fire extinguishing systems

Our BSI Kitemark certification covers the full fire extinguishing system rather than individual components although all the components and other associated equipment in the system must demonstrate conformity to relevant international standards.

- BSI Kitemark to BS EN 15004-1 for the design and performance of the gas extinguishing system. This work is carried out either at the manufacturer's premises or at specialist test labs where the facilities comply with the standard's fire performance requirements

Fire blankets

- BSI Kitemark

Fire detection

Alarm systems

Control and indicating equipment, power supplies and fire extinguishing panels

We offer full compatibility testing of the system (control panel devices) and help with CE and UKCA marking for:

- Construction Products Regulation
- Electro Magnetic Compatibility
- Marine Equipment Directive

We also offer testing to the Marine Agency requirements

- BSI Kitemark

Line units

- Construction Products Regulation (CPR)
- Electro Magnetic Compatibility (EMC)
- BSI Kitemark

Manual call points

- Construction Products Regulation (CPR)
- Electro Magnetic Compatibility (EMC)
- Low Voltage Directive (LVD)
- BSI Kitemark

Smoke and heat detectors

For multi-criteria detectors combined testing can be undertaken.

- Construction Products Regulation (CPR)
- Electro Magnetic Compatibility (EMC)
- Low Voltage Directive (LVD)
- BSI Kitemark

Voice and visual alarms

- Construction Products Regulation (CPR)
- Electro Magnetic Compatibility (EMC)
- Low Voltage Directive (LVD)
- BSI Kitemark

Wireless systems

- CE marking
- UKCA marking
- BSI Kitemark

System installation

Fire alarm, suppression and emergency lighting

- Certification is available for fire alarm systems, fixed fire fighting systems and for emergency lighting
- BAFE approval is available for design, installation commissioning and maintenance of these schemes
- BSI Kitemark

Emergency lighting

- CE marking
- UKCA marking
- ENEC mark for emergency luminaires
- BSI Kitemark

Domestic alarms

Domestic heat/smoke/CO alarms

- CE and UKCA marking against the standards can be complemented by full compliance testing under:
- Electro Magnetic Compatibility (EMC)
- Low Voltage Directive (LVD)
- BSI Kitemark

Domestic combination alarms and domestic combustible gas alarms

For combination alarms, combined testing can be undertaken to the appropriate standards.

- BSI Kitemark

Smoke alarms for the deaf and hard of Hearing

These take on a number of forms; visual with the use of a beacon, or tactile in the form of a vibrating pad or pillow, or both.

- BSI Kitemark

Transferring your certification to BSI

If you're looking to gain access to new markets and take advantage of our expertise, transferring your certification to BSI can bring real benefits.

Our Certification Managers, Client Managers, Test Engineers and Business Development Managers have a thorough understanding of the testing and certification process.

You'll be assessed by the most appropriately experienced professional, perfectly suited to your requirements.

Transferring your existing certification to us is very straightforward – just 4 simple steps.

1

Contact us

Telephone or email us for a no-obligation review of your needs, and a written quotation. We operate with complete cost transparency for your peace of mind.

Call: +971 4 870 9300

Email: bsi.me@bsigroup.com

2

Apply

Send us your application together with:

- A copy of any current certification for your product and service if available

- Your latest assessment report*

- Your latest audit test report

- A copy of your type test report**

- We'll then send you a written quotation for your review

3

Receive your certificate from BSI.

4

Keep improving

We'll agree a programme of continuing assessment visits and audit testing to help you maintain your certification and continue to drive improvements for your business.

*   if carried out by an accredited body and not more than 6 months old

**   Your type test report should be preferably less than two years old. The work should be conducted by a reputable, accredited lab where we recognise the equivalence of the work they do matches with our own.

Additional services

We help manufacturers around the globe by supporting claims of compliance for new and innovative products. You can also use our multiple certification solutions to make sure you have the resilience to be able to cope with growth and be prepared for future challenges. Companies choose our services to protect their supply chain, their data and their operations.

Training from BSI experts

We offer one of the widest ranges of standards-related training available from quality management to managing your energy effectively. We don't just train you to meet standards – we help you to understand how to embed them into your organization.

We know what an auditor will look for – so we train you to meet it. We know the thinking behind the standard – so we can convey that to drive and inspire your people.

We have a team of expert tutors working across the world who can transfer the knowledge, skills and tools your people need to embed standards of excellence into your organization. They have vast amounts of training and assessment experience, and work across a wide range of business sectors.
