Our approach – accelerated learning

Our accelerated learning approach is proven to fast-track learning and improve knowledge retention.

You'll participate in activity-based learning and have the opportunity to share your learning experience with peers from other companies which will help embed your learning.

Expert tutors

Our tutors are recognized as experts in their field, offering a world-class learning experience that our delegates rate as first class.

They are trained to understand and meet your different learning needs, have years of practical industry experience, as well as deep subject matter knowledge.

Your BSI certificate

On successful completion, you'll receive a certificate that's recognized worldwide.

A BSI Training Academy certificate is a mark of expertise, quality and integrity.

Types of training

BSI offers training in many different formats:

Online training

With BSI's 'live' online training, you can take the same high-quality classroom course with the same expert tutor, simply delivered in a virtual environment, regardless of where you're located.

You can even book a course that's dedicated to your organization, so a group of you can all train at the same time – from anywhere.

Classroom training

Our public training courses take place in venues outside of the employee's daily office environment creating an opportunity to network with peers with similar objectives.

Attendees are away from office distractions and benefit from interacting and networking with people from other organizations.

In-house training

An in-house training course is one held at your premises and is open only to your employees. Training in-house eliminates travel expenses and additional time away from the office. It also keeps your content and discussions confidential.

Study at your own pace and in your own time:

E-learning

On-demand learning is a convenient way to study. It's the same, high-quality training that BSI is renowned for, without a tutor or other delegates. You can take the course in your own time, working flexibly around your own schedule. Study is self-paced, online and can be done at the learner's convenience from any location. The course can be accessed 24/7 and can be re-visited as often as the delegate chooses over a 12-month period

Distance learning

Allows you to study at your own pace and whenever is convenient to you.

It's cost effective and puts you in control of your learning.

If you think you may need training in a different format then please contact us to discuss what alternative options we have available.
